Key Expertise/skills: Java, Spring Boot, GoLang, Data Structures and Algorithm, Redis, DBMS, Object-Oriented Programming, MYSQL, MongoDB, Kafka, Microservices, REST APIs, CI/CD, System Design, caching, observability, concurrency, distributed systems, AWS.

INTERNSHIP

Nokia

JAN 2021 – MAY 2021

Software Intern

Bangalore, India

- Generate Data Call flow and set Feature Flag between AUSF and UDM. Automated the scripts with the help of python robot framework to test the data flow between AUSF, NRF and UDM.

PROFESSIONAL EXPERIENCE

TEKION

JULY 2023 – Current

Backend Software Developer - II

Bangalore, India

- Delivered the development revamp of eSign & Documents, streamlining signing, approvals, and uploads, enhancing dealer sentiment and increased dealer sign-ups by 13%.
- Designed and built end-to-end a system enabling real-time visibility of updated customer documents by dealers across multiple dashboards, including CRM, Deal Page, and Signing Dashboard, improving cross-functional access and workflow efficiency.
- Consolidated dealer-level MongoDB into a multi-tenant global schema with tenant-aware partitioning and lowered namespace spend and simplified ops, executed zero-downtime cutover with dual-writes and backfill validators
- Developed a template-driven, data-embedded PDF and report generation framework with automated field mapping and e-sign artifacts, enabling 100 % paperless dealership workflows.
- Key Skill – JAVA, Spring-boot, MongoDb, Kafka, Microservices, REST API, System Design

UNACADEMY

JUN 2022 – APR 2023

Backend Software Developer

Bangalore, India

- Conceived and led “Learner Insights” during a company-wide hackathon; surfaced high-performing free learners, enabled targeted educator outreach, and increased paid conversions by 17% for identified cohorts; recognized by the CEO and selected as the hackathon’s flagship project.
- Built Comments for Community in the Learner App, enabling two-way educator-learner conversations; launched to 800K+ active paid subscribers and increased session engagement by 13% .
- Developed a hybrid course category supporting both live and recorded sessions, unlocked flexible course creation for educators and increased course completion rates.
- Worked on educator community that helped the internal business team to broadcast information to the educators.
- Integrated Amplitude events with WebEngage, standardizing analytics and enabling multi-channel messaging (email, push, SMS, WhatsApp) with attribution
- Key Skill – Go Lang, DBMS, SQL, Redis, Kafka

Tila.com E-commerce Platform

MAY 2021 – JUN 2022

Backend Software Developer

Bangalore, India

- Built a REST-based SWIM integration to sync inventory with third-party vendor warehouses in near real time, standardized SKU mapping and reduced stock mismatches and overselling.
- Created two-step verification feature in Reviews-Service to eliminate inappropriate review comments from users, reducing inappropriate review submissions by 85%
- Designed and integrate end-to-end flow of code for third party seller to sell Gift cards on platform.
- Key Skill – Java, SpringBoot, Kafka, DBMS, SQL
