

VIRENDRA PRATAP

Whitefield, Bangalore Karnataka | +918400295609 | pratapvirendra47@gmail.com | [Linkedin](#) | [Profile](#)

Technical Skills

- **Languages & Frameworks:** JavaScript, TypeScript, React, Redux, Node.js, Python, HTML5, CSS3, GraphQL, REST APIs
- **Testing & Tools:** Playwright, Jest, React Query, Lighthouse, React Profiler, Figma
- **DevOps & Versioning:** Docker, Nginx, Git, GitHub Copilot
- **Architecture:** Micro Frontend Architecture, Custom Hooks, Storybook

EXPERIENCE

Whatfix | Software Engineer (E4) | August 2025 – Present | GWT(Java), ReactJs, JavaScript

- Conducted end-to-end **performance analysis and optimization** of the Whatfix Studio Chrome extension, improving client-side efficiency and backend interaction latency.
- Refactored core application modules across both **frontend (React/JS)** and **backend integration layers**, improving **code quality, architecture consistency**, and long-term maintainability.
- Redesigning and modularizing major UI components strengthened **state management**, and improved data-flow patterns to deliver a more scalable full-stack architecture.
- Implemented comprehensive **error-handling and exception-management logic** across client and API layers, increasing application reliability and reducing failure rates.
- Diagnosed and resolved complex **full-stack issues** reported by enterprise client Workday, including performance bottlenecks, API authentication failures, and data inconsistencies.

Walmart Global Technology | Software Engineer III | Jan 2022 – July 2025 | ReactJS, JavaScript, Jest

- Working with the Marketplace seller centric platform which helps sellers across US to help them to increase their GMV by boosting their catalog through correct recommendation
- Designed and implemented a microfrontend-based Event Center dashboard using Webpack Module Federation and custom shell integration.
- Enabled parallel development across teams and decoupled deployment pipelines. Integrated shared component using pub-sub event model and versioned UI.
- Worked with Assortment-Explorer webapp helped the total of **3000+** unique sellers in 1 month to explore the items outside their category
- Worked with Assortment-Recommendation web-application that helped in achieving the GMV of above **\$800M+** in the FY-25
- Worked with Assortment-variants which is subsection of Assortment – Recommendation and Assortment- Explorer which will have a major impact in GMV for FY-26
- A total of **7000+** unique sellers visited the assortment explorer web-application achieving the conversion rate of **~12%** that help in the GMV boost of **\$12M+**.
- Contribution to Walmart Internal seller-center components such as Link and Select-filter components which follow a Storybook design pattern.
- Implemented Scalable data-fetching architecture using React-Query and custom hooks, enabling reusable async workflows and streamlined error handling across microfrontends,

- Conducting code reviews and documentation and taking on complex bug fixes
- Driving strong collaboration with other engineers, designers, and product managers to understand user pain points and iterate on great solutions
- Integration of Mix panel analytics dashboard to marketplace seller-centric platform to track the user behavior and monitoring user experience in our micro frontend application
- Experience of working with Graph QL queries
- Leading, Onboard and mentoring junior engineers
- Developed a **frontend architecture of Event-Center dashboard** for leveraging the assortment application

Gameskraft | Software Engineer | Bangalore | August 2020 – Dec 2021 | ReactJS, Javascript, Redux

- Worked as individual contributor in developing poker lobby frontend design for web and mobile (Responsive implementation)
- Worked with different teams in creating plug and play architecture for similar poker designs.
- Analytics tools integration like **Clever Tap** and **Apxor**.

Arzooo.com| Software Engineer | Bangalore | August 2019 – August 2020 | ReactJS, javascript, Nodejs, Python

- Worked on the B2B e-platform and helped in creating the web application for accounts and purchase order teams.
- Worked on web generated purchase order pdf generation in **Angular JS** and **Node JS**.
- Worked on web generated sales invoice pdf generation **React JS**.
- Implemented web crawler in python for websites like Amazon and Flipkart using **Python**.

Story Xpress | Software Engineer | Bangalore | June 2018 – August 2019 | ReactJS, PHP

- Worked on updating technology stack for an application i.e. **React JS** and **Material UI**
- Worked on developing screen recorder chrome extension.
- Worked on developing autosave features for both frontend and backend (API Level).
- Worked on the enhancement of product sliding features.
- Worked with API written in **PHP** and **Node JS**.
- Written parser logic for HTML text.

PROJECTS

LLM-Based Chatbot (Feb 2025 – Present)

- Built a chatbot leveraging **Langchain.js**, **Vanilla JS**, and **Supabase Vector DB**.
- Uses OpenAI embeddings to store Q&A data and retrieve the nearest match from the vector store.
- Created end-to-end UI with real-time match retrieval and local embedding storage.

EDUCATION

Dhirubhai Ambani Institute of Information and Communication 2018

Bachelor of Technology

ACCOMPLISHMENTS

- Awarded Bravo award from Walmart Marketplace Assortment team as an individual contributor and fast learner.
 - Awarded as an individual contributor and on-time delivery of projects in Game kraft-Poker webapp team.
-
