SUMMARY

Software Engineer with around 3 years of experience in software development and leading product cycle from conception to completion. Involved in launching 4+ products for enhancing customer experience and relationship management in Danske Bank.

EXPERIENCE

IT Software Engineer

Danske IT India (Danske Bank)

📅 10/2022 - Ongoing 📍 Bangalore

- Developed the UI of Meeting Assistant app using ReactJS, designed for providing relevant meeting information and tools during customer-advisor meetings, which reduced the turn-around time of customer query resolution via meetings by 70%.
- Introduced 16+ reusable widgets (e.g. - Meeting Agenda, Slide deck, Accounts Info, etc) as micro apps inside the Meeting Assistant application, which are currently used bank wide as and when required to fetch customer data from respective departments.
- Integrated REST API endpoints in front-end using JavaScript to display retrieved JSON data in Meeting Assistant.
- Documented the developed projects in detail in Confluence to streamline business procedures and team practices, thereby helping guide new team members and reducing onboarding time by 50%.

IT Software Engineer, Associate

Danske IT India (Danske Bank)

📅 07/2020 - 10/2022 📍 Bangalore

- Partnered with the Customer Portal team to develop a digital KYC feature during COVID-19 to onboard new customers online, thereby accelerating the customer onboarding process by 40%.
- Proposed the idea in the firm's annual hackathon to develop a referral tool which would allow bank employees to refer their friends and relatives as customers of Danske Bank, which got selected as one of the top 5 pitches and was later decided to be implemented across the firm.
- Collaborated with business stakeholders, software architects and senior developers to discuss the architectural design and develop the Referral Tool, which benefited the bank with a 10% increase in the bank's overall customer growth.

Software Development Intern

Wipro Limited

📅 05/2019 - 07/2019 📍 Bangalore

- Gained knowledge about JAVA, object-oriented programming and MVC concepts by attending a 5-day extensive workshop on the Spring framework.
- Developed 3+ RESTful APIs as per business requirements for an ongoing client project and generated Swagger URLs for the same by using Open API documentation.

Software Development Intern

Reliance Jio Infocomm Limited

📅 05/2018 - 06/2018 📍 Kolkata

- Collaborated with a team of 6 experienced developers to write efficient solutions and learnt the importance of review and refactoring for code to become production-ready.
- Eliminated existing bugs of the firm's Customer Issue Resolving system using academic knowledge of JavaScript, thereby reducing the incident frequency by 15%.
