Experienced Android App Developer | Java | Kotlin | Asynchronous programming

@vissraaj08@gmail.com Noida, India <https://www.linkedin.com/in/vissrajora/>

PROFESSIONAL EXPERIENCE

Software Development Engineer-1

Tiket.com

Aug 2022 - Present Noida, India

- Developed 20+ centralised components and custom views used across the app.
- Working on VOIP for help center in Tiket.
- Worked on webview, image optimisation feature(showing image to user based on network and phone configuration), also worked on Things to do feature(vertical), which is used to do things near their locations.
- Worked on fetch api, which is used by the front end as a JavaScript interface which hits the rest api natively and passes the response to the front end.
- Improved application cold start time (CST) by optimising dependencies and layouts,
- Wrote clean production code with user authentication, utilised Firebase Auth, Gmail Integration, and Mobile OTP Auth Integration.
- Conducted robustness testing, executed edge cases, usability, and general reliability analysis.
- Technologies used: Java, Kotlin, XML, Firebase, RecyclerView, ViewPager, User Authentication, JSON parsing, coroutine, retrofit.
- Implemented static app shortcuts for quick access to key modules

Android Developer

Cloud-Centric Pvt Ltd

Apr 2021 - July 2022 Noida, India

- Implemented offline and online functionality, ensuring seamless user experience in low-network conditions.

PROJECTS

Tiket.com App

- Developed a centralised permission model for streamlined access control across all app verticals.
