

# VISHAL RAJPUT

Product Manager

## WEBSITES, PORTFOLIOS, PROFILES

- <https://www.linkedin.com/in/vishal-singh-rajput-1b2671133/>

## PROFESSIONAL SUMMARY

Product Manager with over **5** years of experience in tech and product roles, including **2+** years leading product launches at AI-powered and blockchain-enabled digital platforms. Former Co-founder & CPO at PropFTX, Propulence, and Phoenix Escrow, where I launched India's first fractional real estate marketplace and a digital escrow platform. Skilled in product strategy, user-centric design, scalable systems, and regulatory compliance, with a strong focus on delivering impactful fintech, proptech, and Web3 solutions.

## SKILLS

- Product Strategy
- Roadmap Development
- Go-to-Market (GTM) Strategy
- Feature Prioritization
- Product Lifecycle Management
- Product-Led Growth
- Data-Driven Decision Making
- A/B Testing
- Figma
- User Experience (UX) Design
- Stakeholder Management
- Agile & Scrum Methodologies
- Cross-Functional Team Leadership

## WORK HISTORY

**Note:** Led multiple parallel initiatives under PropFTX Group as part of a multi-product innovation strategy.

| CO-FOUNDER & CHIEF PRODUCT OFFICER                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 07/2023 – Present |

| PropFTX, Bengaluru India                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                   |
| <ul style="list-style-type: none"><li>Led the product strategy for a <b>digital investment platform</b>, managing growth across web, mobile, and admin portals.</li><li>Built and deployed "<b>AI Navigator</b>," a proprietary AI tool using <b>100+ parameters</b> to predict 5-year property prices with 95% accuracy, delivering personalized investment recommendations.</li><li>Increased monthly active users to <b>15,000+</b> and grew <b>₹100 Cr+</b> in property inventory through product-led initiatives and referrals.</li><li>Prioritized and executed high-impact experiments across onboarding and dashboard UX, reducing onboarding time by <b>50%</b>.</li><li>Integrated <b>PayU, Castler, HyperVerge, and Freshworks</b> for payment, compliance, and support streamlining operational flows.</li><li>Defined the product roadmap with quarterly OKRs aligned to investor acquisition and retention KPIs.</li></ul> |                   |

- Sole product owner of the **admin control dashboard** and **mobile apps (iOS & Android)**, managing full lifecycle across onboarding, compliance, and operations.
- Reduced onboarding time by **50%** through automation and user-focused dashboard design.
- Built and managed the **PropFTX blog site** using **WordPress CMS**, improving SEO visibility and driving inbound traffic through regular content updates and performance optimization.

#### CO-FOUNDER & CHIEF PRODUCT OFFICER

08/2024 – 06/2025

Phoenix Escrow (PropFTX Group)

- Defined the product vision and led the development of a **scalable, API-driven escrow infrastructure platform** designed for B2B use cases across industries.
- Built **conditional workflow systems** enabling **milestone-based fund disbursements** and automated legal verifications, significantly reducing transactional risk for all stakeholders.
- Integrated **AI models** for **real-time fraud detection** and **transaction monitoring** to support compliance and trustee-level oversight.
- Designed and launched **custom dashboard** for SEBI-approved trustees like **MITCON** and **UTSL**, offering visibility into fund flows, compliance status, and trigger-based actions.
- Partnered with **IDFC, Kotak, AU, and Yes Bank** to enable **regulated, secure fund movement**, ensuring interoperability with banking infrastructure.
- Created **developer-focused onboarding workflows** and technical documentation to streamline adoption for B2B clients, including a **leading insurtech company**.
- Enhanced enterprise adoption through **UX optimization**, seamless integrations, and modular implementation tailored to varying industry needs

#### CO-FOUNDER & CHIEF PRODUCT OFFICER

01/2025 – 06/2025

Propulence (PropFTX Group)

- Built a platform allowing users to invest in real estate through digital tokens.
- Created and executed the **product roadmap** for secure, transparent property transactions.
- Introduced a community rewards and governance system, increasing user participation by 25%.
- Streamlined **blockchain integration** with traditional real estate systems.

#### DATA SCIENTIST

07/2022 – 06/2023

Microsoft

- Contributed to **Microsoft's Co-pilot program** by embedding **generative AI** capabilities into core **Office** and **Azure products**, enhancing productivity and cloud-native experiences for enterprise users.
- Designed and deployed **machine learning models** for **semantic search, anomaly detection**, and **real-time predictions**, optimized for low latency and high scalability in production environments.
- Implemented and maintained **distributed ML pipelines** using **Azure ML**, ensuring high performance, fault tolerance, and efficient resource utilization at cloud scale.
- Collaborated cross-functionally with product managers, designers, and engineers to shape end-to-end **AI-driven workflows** and improve usability, integration, and adoption across Microsoft 365 and Azure platforms.

IBM

- Developed **ML models** to identify patterns in large enterprise datasets.
- Designed **predictive systems** for decision support across verticals.
- Ensured **model accuracy, interpretability, and readiness** for production environments.

## EDUCATION

---

2016 - 2020

**Bachelor of Engineering Technology**Ramaiah Institute of  
Technology

GPA: 9.0 / 10

## LANGUAGES

---

- English
- Hindi

## PROJECTS

---

1. **PropFTX** – A fractional **real estate investment platform** that leverages **blockchain** to fractionalize high-value properties into digital investment units. **AI** is used for property evaluation, pricing intelligence, and investor profiling, while **Generative AI** powers personalized dashboards and investment recommendations.

2. **Phoenix Escrow** – A **digital escrow system** built for secure, conditional fund management across real estate and B2B transactions. It enables milestone-based disbursements and reduces transactional risk by ensuring funds are released only upon successful verification of predefined conditions.

3. **Propulence Blockchain** – A blockchain protocol designed for fractional ownership and decentralized governance of real-world assets. It supports smart contract automation, transparent ownership tracking, and integration with AI-based valuation engines. Generative AI aids in automated reporting, governance proposals, and investor insights.

## RECOGNITION

---

- Finalist - Top 10 Innovation of the Year in Proptech, **GRI India Awards** (GRI India 2024).
- Featured in **Republic TV, ANI, ET NOW**, and **ThePrint** for product innovation in real estate tech.
- Successfully launched and scaled 3 startup ventures as co-founder, **leading product from 0→1 and beyond**.
- Finalist on **Shark Tank India** Season 5

## FUNDING/PARTNERSHIPS

---

- Raised **₹1 Cr** in seed funding from angel investors & startup accelerator.
- Partnered with renowned property developers for PropFTX. Collaborated with banks such as IDFC Bank and Kotak Bank, AU Bank and Yes Bank for Phoenix Escrow, along with NBFCs for escrow adoption.
