ABOUT ME

"As a highly adaptable and quick learner, I have gained experience in a diverse range of technologies, making me a versatile and skilled individual. I excel at taking on new challenges and thrive in fast-paced and high-pressure environments. I am confident in my ability to succeed in any task I am given and bring a positive attitude and strong work ethic to every project."

EXPERIENCE

Backend Engineer

CRED

 March 2023 – Ongoing

 Bangalore, India

Custom CI/CD Metric Platform

- Built an application in **GoLang** to store custom metrics coming from CRED's in-house CI/CD platform, so later it can be exposed to Prometheus to visualize and gather meaningful insights.

Automated Canary Deployments

- Canary deployments are necessary to make sure that error-prone code doesn't go to production and in case production deployment is required then blast radius can be reduced.
- Canary Deployments take a lot of time due to manual intervention required for testing. To automate the process, did a POC on an open-source tool named **Kayenta** developed by Netflix. It in real-time analyzes the metrics between the canary and main stack and see if the new code deployed in the canary stack is healthy.
- Currently implementing a new custom stage in CRED's in-house CI/CD platform to perform automated analysis.

Mock Platform

- Multiple teams were facing issues while testing their service due to their dependency on other services, hence the requirement of Mocking the API response was required.
- Gathered all the use cases users have and explored multiple open source tools, finally opted for MockServer as a tool and built a stateless, Mock as code platform where people can define mocks using simple **Java** code.

Automation Tool to Fetch Quality Metrics across CRED

- Identified the problem of manually updating metrics from different sources like TestRail, SonarQube, and JIRA across multiple teams every month where bandwidth and collaboration of several engineers are required.
- Created an **AWS Lambda function**, which accepts team-specific parameters, and fetches data from each of these sources, computes the meaningful metrics, and creates/updates the data in a Google Sheet via Google Sheet API.

Integrated a 3rd Party Vendor in the Payment Ecosystem

- Integrated a 3rd party vendor in the current Payment Ecosystem to support various types of payments.

Senior Software Engineer

Groww

 August 2020 – February 2023

 Bangalore, India

Bharat Bill Payment System

- Created **HLD & LLD** for BBPS as well as Non-BBPS billers to make the billing system seamless for the customers.
- Implemented Orchestrator Service which orchestrates the whole bill payment flow and Subscription Service, which on fetching a new bill for a user creates a subscription, so we can inform the user before the next billing cycle.
- Mentored 2 developers for building the other services.

Developer Productivity Platform

- In order to strengthen the security using proper access management & increasing **Productivity of the Developers** & decreasing dependency on the **DevOps**, developing a Central Platform from scratch using **Angular, Kotlin Spring Boot & MongoDB**
- Developer can onboard & deploy services till production.
- Via this platform developers will be able to Manage Secrets, View Logs, Scale & Restart Pods, Manage Kafka & many other functionalities on their own.

Hercules (To Buy & Sell Crypto)

- Created **HLD & LLD** for systems like **Order Management System, Holdings, Payments, Payment Gateway, Data Service** (to show real-time Coin Price), **Onboarding & Auth Service**.
- Implemented Order Management System, Payment Gateway, and some part of other services from scratch using **Java Spring Boot, GoLang & MySQL**.
- Worked as a **Lead Developer** in a team of 8 developers to build the complete product.

- Scrum Master
- Managed **Sprint Planning & Standup** of the team for more than a year.

- KrakenD API-Gateway
- Customised **KrakenD** framework to develop API-Gateway as per Groww's Requirement.
 - Migrated all the services in Groww from old API gateway.
 - Wrote an article on the same on medium

- Message Board Platform
- Created **HLD & LLD** for Message Board Platform which is used to show important updates & take user input.
 - Mentored** 2 engineers to develop the end to end system.

- Communication Platform
- Integrated multiple vendors to send **Communication** to the customers.
 - Created a sub-system to track the usefulness of communication based on parameters like Success Rate, Open Rate, etc.
 - Developed an in-house **CMS** platform for managing Communication Templates from scratch.

- Groww Stories
- Created **HLD & LLD** for Groww Stories & **Mentored** 2 engineers to develop the end to end system.

- User Preference Platform
- Developed a **microservice** using **GoLang & Elasticsearch** to whitelist product & features for the customers and serve user based config.

- Recent Activities
- Created **HLD & LLD** for Recent Activities which is used to show the activities done by the user recently. On-clicking on a particular activity customer can see all the questions related to that and raise a query also.
 - Mentored** 2 engineers to develop the end to end system.

Full Stack Intern

Nuclei

 Dec 2019 – Feb 2020

 Bangalore, India

- Bank Onboarding Platform
- Designed and implemented an end-to-end Bank Onboarding Platform utilizing **GoLang and Angular** technologies, facilitating seamless onboarding of new banks and updates to existing bank data.

PROJECTS

Department Information System

Shri Govindram Seksaria Institute of Technology and Science

 July 2018

 Indore, India

- Worked under Department of CSE Advanz101, Indore to developed a software for automating various departmental activities
- We used **Java Spring Boot, MySQL Angular** to develop these system.

ACHIEVEMENTS

Winner

Groww Hackraft Hackathon

 Dec 2022

 Bangalore, India

EDUCATION

B.E. | Computer Science | 7.77/10
Shri Govindram Seksaria Institute of Technology and Science
📅 June 2020

📍 Indore, India

XII, Higher Secondary | 91.2%
Vidhya Sagar Public School
📅 May 2016

📍 Khategaon, India

X, Secondary | 9.8/10
Pushpdeep International School
📅 May 2014

📍 Khategaon, India

VOLUNTEERING

Director of Marketing
ERIDE NGO
📅 March 2017

📍 Indore, India

- Worked in a team of 10 coordinators for spreading digital literacy in India.
