Career Objective

Seeking a position in an organization that provides an opportunity across the industry to explore & excel while carving out my skills for personal, professional as well as organizational goals.

Professional Summary

- Competent and diligent professional with **4+ Years** of experience in the Development of applications, currently spearheading as a Software Consultant.
- Working with Capita, Pune since 16 August 2021 to present as Software Consultant.
- Strong understanding of Development and Implementation and knowledge of various technologies like Java, Spring, Hibernate, Spring Boot, Spring-MVC, Microservices, Spring Boot JPA.
- Knowledge of Spring Boot, Spring Boot JPA, RESTful and Microservices.
- Experience in working with API including Log4j.
- Experience in working with databases MySQL Server.
- Used Apache Tomcat 8.0 web server.
- Knowledge of Software Configuration Management tool as GIT.
- Excellent in analysing, problem-solving, and team member skills.

Technical Skills

- Languages & Technology: Core Java, J2EE, Microservices, Rest API
- Framework: Spring, Hibernate, Spring Boot, Spring MVC, Log4j, JUnit, Camel, Spring Web Flow
- Database: MySQL Server, Oracle
- Web & Application Server: Apache Tomcat 8
- Operating System: Windows 7, 8, 8.1, 10
- Web Services & Technology: RESTful API, Microservices
- Tools: IntelliJ IDEA, Eclipse, STS, GIT, Maven,

Work Experience

1) Capita, Pune (16th August 2021 to Present)

Projects Handled

1) Project Title: Secure Card Portal (SCP)

Role: Jr. Java Developer

Technology: Core Java, Spring MVC, Maven, RESTful API, XSLT, Java Script Spring Web Flow.

Database: MySQL Server

Description: SCP provides different types of payment platform services to consumers like Pay by Open Banking, Pay Using Card, Pay by Apple Pay, Pay Using Visa etc.
SCP provides ThreeDS Security to customers/merchants as per requirements.
SCP provides an end to flow to Issuer Bank and Acquire Bank. SCP also provide ThreeDS security to merchants and Users as per requirement.
SCP handles the validations like request and response from Clients, Third Party API's.

Roles and Responsibilities: Worked on different aspects of the application which includes applying validations, enabling new features and fixing ongoing bugs at the top priority. Also working on database related stuff like create table, stored procedures.

2) Project Title: Nuapay Open Banking

Role: Jr. Java Developer

Technology: Java/J2EE, Spring Boot, Rest API, Maven, MySQL Server, JSON, Postman

Database: MySQL Server

Description: Open Banking is a growing payment method where a customer uses their online banking or mobile banking app to make an immediate bank to bank transfer. This provides improved security and convenience over card payments online without the high cost.

Roles and Responsibilities: Responsible for creating Rest API's. Handled the third-party API responses while hitting the request and stored this data into database as per requirement. Resolve maven dependency issues like critical, high risk by updating/deleting the dependency by maven tree. Responsible for creating tables, updating table and created stored procedures to perform database operations.

3) Project Title: ThreeDS Secure 2.0

Role: Jr. Java Developer

Technology: Java/J2EE, Spring Boot, Rest API, Maven, MySQL Server, JSON, Postman

Database: MySQL Server

Description: Implementation of 3D secure 2.0 in our application and eliminating 1.0 which was less effective in terms of preventing fraud and fast, secure authentication. All our applications such as SCP, ThreeDSV2-Adapter now support 2.0 effectively.

Roles and Responsibilities: Responsible to add new ThreeDS 2.0 version into code by adding new variables which is required to Third Party server to get response from them which has changed for 2.0 support.

2) Infosys, Pune (11th March 2019 to 13th August 2021)

Projects Handled

1. Project Title: BUT (Bulk Utility Tool)

Role: BUT Developer

Technology: Core Java, Customized Spring, Hibernate, Camel

Database: Oracle 11g

Description: Bulk Utility Tool is Java based application that works at the heart of several upstream and downstream applications in a telecom workflow. BUT performs bulk data transfer and data processing between several applications. The main communication channels used for exchange between interfaces and BUT applications are XFB (Extended File Broker) and MQ Series (Messaging Queue). BUT can be understood as a “Bulk order orchestration tool”. BUT mostly accepts CSV files as input which contains multiple orders to be processed. BUT performs file and/or order level validations on the input file and then transfers data accordingly to various applications using communication channels like XFB/MQ. After receiving responses from the downstream BUT generates a final report for all records in a single file downloaded by the user. BUT India team Handles IVVT support, Deployment, and 3L production support.

Roles and Responsibilities: Developed the code as per the requirement. Deploy the code on servers using putty. Provide IVVT support during testing on the story Requirement Analysis & Finding Optimized Solution. Responsible for coding as a designer and provided a design document. GIT Code Management JIRA for creating sub-task for given story work and updating on daily basis.

Academic Qualifications

- B.E in Computer Engineering from **Savitribai Phule Pune University** with **64.00%**.
- **12th** from **Maharashtra State Board** with **77.00%**.
- **10th** from **Maharashtra State Board** with **85.53%**.

Personal Details

- DOB: 27/07/1992
- Marital Status: Married.
- Nationality: Indian
- Languages Known: English, Hindi, Marathi
- Current Address: B-806 Casa Grande Building, Near Palm Grove Society, Ravet, Pune- 412201

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned details.
