Software Developer

Excellent coding knowledge in Java Spring Boot, AWS, Golang, Php Frameworks

PROFILE SUMMARY

- A result oriented professional with 5+ years of experience in the area of:
 - Backend Development
 - Java Spring Boot
 - Golang
 - * Cloud AWS
 - * Mysql, MongoDB Database
 - * Php Laravel, Codeigniter
- Skilled in Writing custom API's for the application development.
- Proficiency in managing the database in a clean and clear order.
- Efficient in acquiring and developing relationships from One module to another modules for data accessing and maintaining.
- Efficient motivator, team player and a decisive leader with the ability to motivate teams to excel and win
- Java Development (3+ Year of experience) In Various Java Coding Technologies like Android Application Development and Spring Boot .
- Golang Application Developer (1.5 Years), In Developing Golang Application for Backend application for Various Banking Partners Like Canara, KVB, Equitas, Jupiter, SBM, Niyopay, IOB etc for MandateHQ Project.
- Work Experience on Databases MySql, Sybase & MongoDB.
- Full Stack Developer (4 Months) of experience in Angular 8 Framework.
- 1.5+ Year Experience on Laravel (an University Management Project)
- Hands on Experience on AWS (SSH) server configuration and Installation.
- Hands on Experience in Developing **Webhooks** from scratch.
- Beginner Level Experience on **AWS-Cloud** Platforms.

CORE COMPETENCIES

- Analyzing latest coding trends & tracking competitor's activities; providing valuable outputs for fine working of applications.
- Ability to Implement a whole project in a single hand, No need of external support or any motivation from external sources.
- Able to Understand new coding patterns and new features required for the developing project and those new features are developed in the required project.
- Master in Systems of various operating systems Like Windows, Linux Ubuntu, Zorin OS and Chrome OS.
- Designed and implemented Php Web applications in Cpanel, Linux Server.
- Having knowledge in Version Control Systems like Bitbucket, GitHub. etc.
- Devops Tools Integration for CI/CD like Jenkins, Docker Hub & Kubernetes.
- Implementing applications using various Design Patterns.
- AWS Cloud Developer - Associate on Amazon EC2, Lambda, Amazon DynamoDB.etc

ORGANIZATIONAL EXPERIENCE

SKAYA TECHNOLOGIES

- I Worked Here as a software developer in the Organization as (Internee from the start of my career).
worked for a 3 projects related to the
 1. University Management System. (Laravel 8)
 2. Healthcare Management System. (Core Php, android Application Using Java)
 3. Water Meter Counting Sensor Systems. (Spring Boot & Angular)
- Along with these above projects, developed an Android Apk for Healthcare Management System & Water Meter Billing System.
- Worked on Full Stack Application Project Based On Codeigniter, Laravel & Core Php Using Html, Javascript, Css and Php as a Backend & MySql Database.

Techchefs India Private Limited / Virtusa / Razorpay

- Currently Working as a Backend Integration Engineer For Multiple banks (Like HDFC, SBM, IOB, KVB) For the MandateHQ Project.
- Working on the Rest API for Banks and Mandate Actions For Banks Using Golang.
- Working Experience in SiHub (An Internal Application Mandate Actions For Banks) Using Spring Boot with Golang.
- Working on Java Spring Boot for the Project Universal Dashboard.
- Hands on Experience in CI/CD Pipeline, Docker, Redash, Asana, Kubestash & Kubernetes.
- Along with the Golang Taking care on Java Spring Boot Part for some of the banks who want their code in Java.
- Working on Cardholder Portal Application an Dedicated Mandate Application for Banks for their Cardholder to Manage Credit/ Debit Card Tokens & Mandates Created by Customers

SKILLS

- Spring, Spring Boot (MVC Framework).
- Golang, Redash and SonarQube.
- Microservices Using SpringBoot.
- AWS Cloud,
- Webhooks development & implementation.
- Jenkins, Docker Hub, Kubernetes.
- Git Version Control System (Github, Bitbucket).
- RDBMS (Mysql, MongoDB, Sybase, H2) .
- Android Application Development (On Java 8, JDK).
- Codeigniter, Laravel & Core Php
- Agile/Scrum Methodology.
- Angular 7+.
- Html 5, Ajax.
- Integration Of REST API & API Development Using Multiple Encryption Methodology.
- Learning Node Js & Python For My Future Enhancement .
- Hands On Experience On Docker, JIRA, Asana, Sumologic, BootKube.
- RSA, PGP Encryption & decryption using Golang, Java & Php
- Have Knowledge on JS Frontend Frameworks like ReactJs, Angular.

EXPERIENCE

Skaya Technologies – (Bengaluru, India)

Designation: Software Developer

Duration: Jan 2018 – Sep 2021

Techchefs / Virtusa – (Bengaluru, India)

Designation: Associate Consultant - Technology/Software Development Engineer

Duration: Sep 2021 – Till Date

EDUCATION

- MCA from Acharya Institute Of Technology(VTU) in 2018
- B.Sc Computer Science from Davanagere University in 2016

PERSONAL DETAILS

Date of Birth : 11th October 1995
Languages : Kannada, English, Hindi and Telugu.
Marital Status : Married
Address : C/o #1 C, Sangameshwara laboratories, Dena Bank Colony, Kamakya layout, Banashankari
3rd Stage, Bengaluru - 560085
