SKILLS

- SQL
- Microsoft Power BI
- DAX
- Google Cloud Platform
- DBT-Data Build Tool ELT
- Microsoft Excel
- Google Analytics
- Postman
- Git & GitHub
- Python
- Jupyter Notebook
- Tableau
- Power Query
- VLOOKUP
- Pivot Table

CERTIFICATIONS

- SQL Advance – HackerRank
- SQL Intermediate – HackerRank
- SQL Basic – HackerRank

EDUCATION

B.E. (2013 -2017)

Electronics &

Telecommunication

Vivekanand Education

Society's Institute of Technology

H.S.C. (2011-2013)

Birla College of Arts, Science & Commerce

WORK EXPERIENCE

Saras Analytics - Data Analyst-I

Hyderabad (06/2022 – 03/2024)

- Implemented data connectors to extract Sales data from the E-Commerce Platform into **Google Big Query**, ensuring data updating was monitored.
- Utilized the **DBT ELT tool** to write SQL code for **Data Transformation** and used **Data modeling** techniques to create final tables in Google Big Query.
- Ensured **high data quality** standards by maintaining data integrity with a variance of less than 1% in **data validations**.
- Developed and maintained 5 customized **Power BI** dashboards to meet individual client needs, empowering businesses to enhance **decision-making** across marketing, finance, inventory management domains.
- Performed cohort analysis that identified an opportunity to **reduce CAC** by 20%.
- Implemented scheduled SQL queries in Big Query, resulting in a substantial **monthly time savings of 6 hours** through automation.
- Implemented **Compute Engine** to optimize processing efficiency by migrating Python code from local machines, reducing processing time and manual efforts for handling large datasets.
- Developed 4 **Attribution Models** for clients – First Touch, Last Touch, U shape & Time Decay, optimizing their **advertising spend** allocation across various platforms and enhancing their ROI by 12%.
- Implemented **VLOOKUP** for data validation, **Power Query** for transforming, cleaning data & **Pivot Tables** for summarizing large datasets, for easy analysis.
- Conducted data validation using the **Postman API** testing tool & then performed urgent data extraction using **Python**, ensuring timely insights for decision-making process.
- Trained 2 Junior Business Analysts team members, contributing to an increase in overall team efficiency.

RECOGNITION

- Received the prestigious **Outstanding Performance Award** in March 2023, as recognized, and presented by a Senior Manager.

HERE Technologies - Spatial Data Specialist-I

Navi Mumbai (02/2019 – 06/2022)

- Digitized maps using LIDAR drives, satellite imagery, and video files, achieving **99% precision** for top automotive clients such as AUDI, BMW, Mercedes, and Daimler.
- **Ensured accuracy** and reliability of spatial data for navigation and mapping applications as a Quality Checker on 2 major projects.
- Provided guidance and support to team members as a **Team Mentor** for 6 months, enhancing project performance and skill development.
- Contributed 3 innovative **ideas** for **tool improvement**.

PERSONAL PROJECTS (Python, Tableau, MySQL)

- **Data Analysis of Air Quality of India**
 - Interpreted data from 2015 to 2020 across 25 cities, focusing on the 7 primary pollutants.
- **Data Analysis of Google Play Store**
 - Analyzed data from 2010 to 2011 for over 2 million apps.
- **Data Analysis of Olympic Games**
 - Reviewed data for 200K+ athletes across Olympic Games from 1896 to 2016.
