Career Timeline

Work Experience

Oct'22- Aug'11: Sr. Salesforce Developer | ITC Infotech, British American Tobacco BAT (Single Code), Bangalore

Key Result Areas:

- Led a team in the challenging project of merging four different organizations of BAT, spanning 30 countries, into a unified Salesforce platform, gaining in-depth knowledge of SF metadata items and mastering the deployment process across multiple orgs.
- Displayed expertise in GIT deployment model, ensuring smooth code integration and configuration management, and proficiency in Salesforce structure, including Lightning Aura Components, Apex classes, and Aura definition bundles
- Customized Salesforce applications to meet specific business needs

- Apex
- Batch
- Trigger
- LWC
- VisualForce Page
- Workflows
- Validation Rules
- Approval Process
- Process Builder
- Email Template
- Click.io Tool
- Workbench
- Visual Studio Coding
- REST API
- Telephony Integration
- Data Loader
- Flows
- Import Wizard

Soft Skills

- Time Management
- Team Management
- Analytical Thinking
- Attention to Details
- Result-oriented
- Problem-solving

- Identified and optimized performance bottlenecks in the Salesforce applications

Highlights:

- Implemented CI/CD GIT framework for efficient deployment of Salesforce components, playing a key role in the successful merger of four different organizations into a single Salesforce platform, resulting in streamlined processes and improved efficiency

Feb'22- Oct'22: Sr. Salesforce Developer | ITC Infotech, eBay Offshore, US based, Service Cloud, Bangalore

Key Result Areas:

- Worked on Agile development methodologies, utilizing Jira for task management and tracking progress, and leveraged GIT repository for code and configuration changes deployment
- Successfully merged customer account data from combining data sets from legacy system information into a single Customer 360 page, ensuring data integrity and user access control, and automated manual batch processes through Apex coding, improving overall system efficiency
- Mentored and trained junior team members, facilitating their smooth transition into development roles

Highlights:

- Led the development and integration of Salesforce solutions for eBay, focusing on legacy system cloning and migration, and collaborated with cross-functional teams to understand and integrate various legacy systems into Salesforce using Lightning Web Components (LWC) and Apex classes

Apr'21- Nov'21: Salesforce Developer - Full Stack Developer | Kaplan, Bangalore (Remote)

Key Result Areas:

- Contributed to the successful migration of Salesforce orgs, including the conversion of notes and attachments to files through custom automation development, and developed Lightning Aura Component Bundle to meet custom requirements for in-house users
- Integrated Salesforce with third-party systems using REST APIs and JSON data, and collaborated with cross-functional teams to analyze and select fields, workflows, process builders, and triggers for org-to-org migration
- Utilized Agile development methodologies and Jira for efficient task management, developed custom automation for converting notes and attachments to files, improving data management processes, and created Lightning Aura Component Bundles for in-house team members to display data using tabs on Account Detail Pages
