

Vindhyansh Mall

Software Engineer, OnePlus R&D India

SUMMARY

Passionate and Hardworking Software Engineer having around 2 years of experience with Master's degree from IIT, Kharagpur. Throughout career, majorly focused on writing clean, scalable and well-documented code. At OPlus R&D (Oppo and OnePlus) India, Developed Test automation dashboard using fullstack technologies, Developed camera system for flagship device, automated camera analysis, and enhanced device performance. Designed and developed in-house tools and platforms. Excited about joining product-driven company to solve real world problems and develop cutting-edge solutions.

EXPERIENCE

OPLUS R&D (OPPO AND ONEPLUS) INDIA | SOFTWARE ENGINEER

Aug 2021 – Current | Hyderabad, India

- Developed the Test Automation Dashboard (TAD), an in-house testing web app. TAD, built using React.js, Django and Python, provides developers and testers with a web app platform to create, run, monitor and share tests, reduces setup cost, supports parallel execution, in fire and forget pattern. It streamlines testing processes and enhances software quality. It has not only optimized testing workflows but also contributed to a significant reduction in developer hours previously spent on laborious tasks like setup etc. [React, Django, Python].
- Developed a Log Parser and Analyzer tool to produce initial analysis for application crashes and bugs [C++, React, Python].
- Developed Camera System for flagship OnePlus 10R Device.
- Improve stability of Android's HAL(Hardware Abstraction Layer) and Kernel(Mediatek chipset Helio P35, Dimensity 8100) [C, C++].
- Camera Feature Development like Sensor Privacy, HDR (High Dynamic Resolution) etc in Camera System HAL [C, C++].
- Developed a tool to compare and provide necessary information from system traces to analyze performance of two versions [Python].

PROJECTS

FAIRNESS AWARE MACHINE LEARNING ALGORITHMS

- Motivation and development of Machine Learning Algorithms that do not discriminate against any sensitive group. Analyzed sources of bias in an ML model and surveyed, implemented and compared existing ways to reduce bias in a model

REGRESSION TESTCASE PRIORITIZATION USING HTD BUGS AND FDC SCORE

- Devised and implemented a novel approach to prioritize regression test cases.

COURSEWORK

- Operating System, Data Structure, Algorithm Design, Computer Architecture, Databases, SQL, OOPS, Computer Network

CERTIFICATIONS

-  React - Meta Front-End Developer [Meta, Coursera]
-  IBM Data Analysis with Python [IBM, Coursera]
-  AWS Cloud Technical Essentials [AWS, Coursera]

CONTACT

EDUCATION

INDIAN INSTITUTE OF TECHNOLOGY, KHARAGPUR

M.Tech., Computer Science and Engineering 2019-2021

MADAN MOHAN MALAVIYA UNIV. OF TECH., GORAKHPUR

B.Tech., Computer Science and Engineering 2014-2018

SKILLS

PROGRAMMING & OTHER LANGUAGES

• Python • C++ • C
• Javascript • Typescript • Java • Bash • HTML • CSS

FULL STACK

• React.js • Django • Flask • REST Api • MongoDB • MySQL
• PostgreSQL • AWS • Redis
• Kafka • Zookeeper • SOLR • MapReduce

SYSTEM DESIGN

• OOPS • Design Patterns • Micro services • Architecture Design • Distributed System, Tracing, Debugging • Multi-threading

TOOLS

• Git • Github • Kubernetes • Docker • CI/CD Pipeline • HTTPS/TLS, • Networking • Maven

MACHINE LEARNING

• Pandas • Numpy • Scikit-learn • Keras • Tensorflow

OS:

• Linux • Windows
