EXPERIENCE

JUPITER MONEY | SENIOR SOFTWARE DEVELOPMENT ENGINEER

Dec 2021 – Aug 2024

- Streamlined user acquisition by building an Onboarding Service, making the process modular and attracting a wider customer base. I spearheaded the **high level design of the system breaking a complex business problem into a scalable tech solution** under the guidance of an architect. This included **designing and building** an event-driven **lending origination service** and **platform services for KYC and account verification**. This helped **2x the number of disbursals over the span of 3 months**.
- Developed and maintained the Loans product with the company's lending platform, including loan application processing, risk assessment, and repayment management. The loan book has **crossed 1000cr. worth of loans over 3 lakh applications**. This system handled a scale of **30000 disbursals worth about 100cr. per month** at its peak.
- Developed and launched the Salary Account product, enabling seamless salary deposits and financial management for **1 Lakh+ users across 700 corporates**.
- Mentored a mix group of interns and junior developers aiding them in their journey to become full time employees and even getting promotions.

TESCO | SOFTWARE DEVELOPMENT ENGINEER

Aug 2019 – Dec 2021

- Worked as a backend developer building various functionalities for a system which helps people plan what products to send to stores. Gained valuable experience here w.r.t low level design and writing clean, testable code in Java.

TESCO | SOFTWARE DEVELOPMENT INTERN

May 2018 – July 2018

- Built a 3D modelling tool of a supermarket with movable first person camera and controls. This was built on React360 which is a framework for the creation of interactive 360 experiences based on React.

IIIT HYDERABAD | TEACHING ASSISTANT

Aug 2018 – Dec 2018

- Mentored a class of 150+ students on various scripting languages including JavaScript, NodeJS, Python and Bash.

PROJECTS

MINI WIKIPEDIA SEARCH ENGINE | INFORMATION RETRIEVAL

- Implemented indexing and retrieving search queries on a 56GB Wikipedia dump.

PASTRY - DISTRIBUTED HASHTABLE | DISTRIBUTED SYSTEMS

- Implemented Distributed Hashing using Pastry Routing Algorithm.

SERVERLESS PLATFORM AS A SERVICE

- Built a self bootstrapped architecture in which a user can deploy their application without worrying about the infrastructure and platform

DECAF COMPILER | COMPILERS

- Built a compiler for Decaf Programming Language which is a strongly-typed, object-oriented language similar to Java.

EDUCATION

IIIT HYDERABAD

MASTERS OF TECHNOLOGY

March 2019

VESIT, MUMBAI UNIVERSITY

BACHELOR OF ENGINEERING

March 2017
