 Bengaluru

SKILLS

Version Control tools : GIT, GitHub

Build tools: Maven, Gradle

CI/CD tools: Jenkins, Github actions, ArgoCD

Containerization: Docker

Orchestration: Kubernetes, Yaml, helm, AWS EKS

Bug Tracking tools: JIRA

Operating Systems: Linux, Rhel, Windows

Cloud Environment: AWS, Azure, Terraform

Monitoring tools: CloudWatch, Grafana, Kibana, Datadog

Configuration: Ansible

Other tools: SonarQube, Artifactory

Programming: Shell Scripting, Python

VINEETH M

Cloud Operations Engineer

ABOUT ME

To leverage my skills and experience in cloud engineering to design, automate, and optimize secure, highly available cloud infrastructure, contributing to business innovation, regulatory compliance, and operational excellence at a leading fintech organization. Seeking to drive impactful solutions using AWS, Azure, and DevOps tools, while continuously enhancing system reliability and scalability in a dynamic, growth-focused environment. Adept at collaborating with development and operations teams to troubleshoot production issues, handle customer escalations, and deliver secure, high-availability solutions aligned with business goals.

EXPERIENCE

PAYTM PVT LTD

Mar 2021 - Present

Cloud Operations

- Supported real-time, multi-channel payment operations through effective monitoring and alerting using CloudWatch, CloudTrail, Grafana, Kibana, and Linux-based systems, directly enabling prompt issue resolution under PagerDuty on-call support.
- Engineered, deployed, and maintained highly available payment infrastructure for web and mobile platforms using AWS services including EC2, VPC, MSK, EKS, ECR, S3, IAM and Azure cloud, ensuring seamless digital transactions.
- Automated application delivery processes and managed robust CI/CD pipelines using Docker, Kubernetes, and tools such as EKS for secure, zero-downtime deployments and periodic cluster upgrades.

EDUCATION

Bachelor of Engineering
Sree Vidyanikethan Engineering
College, Tirupati
2013- 2017

PERSONAL DETAILS

PAN **DOWPM3323F**

DOB **16/10/1995**

Nationality **Indian**

Languages **English,Telugu**

- ♦ Automated infrastructure provisioning with Terraform, managing AWS resources and Terraform state files. Proficient in AWS public cloud provider services
- ♦ Conducted advanced troubleshooting, debugging, and resolution of infra, platform, and payment service issues, both proactively and in response to incidents, ensuring minimal transaction failures.
- ♦ Implemented and managed security best practices, configured IAM policies, and conducted regular audits for compliance, protecting sensitive financial and user data across distributed payment systems.
- ♦ Collaborated cross-functionally with SRE and development teams to deliver scalable solutions for web and mobile payments, contributing to key product features and infrastructure improvements affecting millions of daily transactions.
- ♦ Led end-to-end deployment and migration of payment services to AWS and Azure, using Infrastructure as Code (IaC) with Terraform/CloudFormation for repeatable, efficient cloud provisioning and seamless application delivery
- ♦ Automated recurring operational tasks and environment setups with custom scripts and cloud automation tools, significantly reducing deployment time and human error in live payment rollouts.
- ♦ Proactively monitored, analyzed, and responded to critical incidents in production environments, improving incident response times and service recovery via effective playbooks and on-call rotations.
- ♦ Supported blue-green deployments, canary releases, and zero-downtime maintenance for high-traffic payment applications, ensuring continuous availability for end users.
- ♦ Engaged in cross-team planning and root cause analysis following major system events or outages, providing key technical input and driving permanent solutions to infrastructure challenges.
- ♦ Contributed to the development, review, and ongoing improvement of security controls, compliance practices, and cloud security documentation for sensitive financial data in a regulated environment
- ♦ Gained experience on server-side technologies such as Apache, Nginx, and Redis

- ♦ Hold excellent knowledge of common SCM practices, such as branching and code merging
- ♦ Used Terraform state management and change plans to audit, preview, and safely roll out upgrades or configuration changes with minimal operational risk
- ♦ Enabled rolling updates, blue-green deployments, and instant rollback strategies for high-traffic payment services, reducing manual intervention and deployment risk
