PROFESSIONAL SUMMARY

I specialize in full-stack web development and backend engineering. My expertise includes Python 3x, Django, Django Rest Framework, and FastAPI, which I use to build robust web applications incorporating CRUD operations and RESTful APIs. I have strong skills in SQL and ORM frameworks, along with experience in cloud deployment and front-end technologies. I am committed to delivering high-quality code across Ubuntu, Linux, and Windows environments.

Skill

Python | Django | FastAPI | Django Rest Framework | PostgreSQL | MySQL | SQL | ORM (Django ORM) | HTML | CSS | JavaScript | HTMX | React | REST API | AWS SQS | RabbitMQ | Kafka | AWS | AWS Serverless | AWS EC2 | S3 | Docker | Git | GitHub | Pandas | Numpy | SciPy | Matplotlib | Celery | Redis

Work experience

Software Developer

02/2023 - 12/2024

OTS Solutions Pvt. LTD.

Projects:-

- **Feedback & Thrive Index App for (Brandwork):-** The school web app features the Feedback App for assessments and the Thrive Index App for visualizing performance, providing educators with valuable insights into student progress.
 - **Team Size :** 3
 - **Technologies** - Python, Django, Django Rest Framework, Pandas, Numpy, Matplotlib, JavaScript, HTML, CSS, jQuery, Chart.js, Celery, Redis, RabbitMQ, PostgreSQL, Docker
 - **Responsibilities :**
 - Design Database schema
 - Provided strong project leadership to navigate challenges and guide the team toward achieving project goals effectively.
 - Oversaw the development process from initial planning to final deployment, ensuring all aspects of the project were thoroughly addressed.
 - Managed a team of developers by offering clear direction and support, enabling high-quality results through collaboration.
 - Coordinated tasks among team members to optimize workflow and ensure alignment with project objectives.
 - Ensured adherence to project timelines to minimize delays and maintain consistent progress throughout the project lifecycle.
 - Set and reviewed milestones regularly to celebrate achievements and keep the team motivated while focusing on end goals.
- **BTBUC (Broken to Better Urgent Care):-** This application boosts healthcare providers' productivity by allowing easy transcription of patient conversations into notes, with options to accept, reject, or edit the content.
 - **Team Size :** 1
 - **Technologies** - Python, Django, Django Rest Framework, FCM, Redis, Elasticsearch, OpenAI APIs, OpenAI Assistant, FFmpeg, React.js, channels, PostgreSQL, AWS
 - **Responsibilities:**
 - Design Database schema
 - Developed a robust API for the mobile application that integrates with the OpenAI API.
 - Designed and implemented endpoints to facilitate seamless communication between the app and OpenAI.
 - Ensured the generation of OpenAI Assistant responses based on user audio conversations.
 - Developed the API to ensure scalability, enabling it to handle a high volume of requests efficiently.
 - Utilized FFmpeg to compress audio files, allowing for seamless transmission of large files while maintaining quality, ensuring no loss during the process.

- Designed and built an intuitive Admin dashboard using React to streamline administrative tasks.
- Provided administrators with tools to monitor user interactions and manage content.
- Implemented analytics tracking for data analysis and insights.

Software Developer

03/2022 - 01/2023

(Ashmay Technologies Ltd.) Ezyschooling.com

- **Ezyschooling.com** is designed to simplify the school admission process, allowing parents to submit applications to multiple schools with a single application, thus eliminating the need for individual visits to each school.
 - **Team Size** : 4
 - **Technologies** : Python, Django, Django Rest Framework, AWS SNS, S3, Postgresql, Elasticsearch, RabbitMQ, and Celery
 - **Responsibilities** -
 - Design, write, test, and maintain code to implement new features and functionality in the app.
 - API for the integration of multiple third-party APIs, services, and tools for sales, parent relationship management, marketing team, CRM creation, school profile creation, and dashboard.
 - Coordinated with other team members to address problems and receive feedback on the latest release features.
 - Develop test cases and test scenarios based on project requirements and specifications.
 - Creation of multiple third-party APIs for different platform users, allowing them to interact with the platform.
 - Integration of various services with the platform to ensure that users receive all details of their activities on Whatsapp and email from the platform.

Software Developer

09/2020 - 02/2022

Nectar Infotel

Projects:-

- **Breathing Exercise App** :- This app is developed for both Android and iOS platforms, uniquely designed to promote users' lung health. It includes various breathing drills that users can follow as breathing exercises. Each drill features pre-recorded audio and visual commands, with easy-to-follow rhythms to enhance the user experience.
 - **Team Size** : 2
 - **Technologies** : Python, Django, Django Rest Framework, BootStrap, Chart.JS, MySQL
 - **Responsibilities**
 - Design and development of dashboard that includes data showcase for total no. of users, different plans opted by the customers, revenues earned and popular plans based on the user data collection in a bar chart and line graph display.
 - Developed and integrated language translation feature in the app.
 - Developed API to integrate Meshulam Digital Payment gateway.
 - Created the exercise drills based on timer to perform inhale and exhale breathing exercises.
 - Debugging errors and cleared the assigned bugs.
- **Hospital Management System** :- This product simplifies hospital management with a Python and Django backend. Patients can book appointments online, and administrators can manage time slots. It also includes pharmacy inventory for easy prescribing and a billing system for registration and invoices.
 - **Team Size** : 2
 - **Technologies** : Python, Django, BootStrap, MySQL
 - **Responsibilities**
 - Designed database schema
 - Designed and developed Doctor's module in which admin can insert or modify the data. Admin can also upload patient's data in the form of image or text.
 - Designed and developed appointment module in which user can choose their preferred date and time for doctor's appointment through web application. The key features of this module are dependent drop down function and restrict date function.
 - Handled the push notification feature.
 - Developed coupon code generating functionality.
- **VMS** :- The VMS (Visitor Management System) App is a cross-platform application for Android and iOS. It helps manage visitor information at social venues, including who they visited and the duration of their stay.
 - **Team Size** : 1

- **Technologies** : Python, Django,Django Rest Framework,MySQL
- **Responsibilities**
 - API Design and development for the mobile application
 - Created admin related action dashboard.
 - Designed the Database architecture.

Education

Bachelor of Computer Application

2014 - 2017

Himachal Pradesh University

Management Business Administration in IT

2018 - 2021

SGVU , Rajasthan
