

VINOD KUMAR MEENA

Work History

- 2023-10
- 2023-12

Software Development Engineer 2
CashFlo, Bangalore
 - Designed and implemented an automated file ingestion process for the ERP Plugin Layer for various clients ERPs using AWS services such as Amazon SQS, AWS Lambda, Amazon S3, and Apache Kafka. The process was optimized to ensure efficient and reliable data transfer, enabling seamless integration with the clients existing systems.
- 2022-11
- 2023-10

Software Development Engineer 2
Snappmint, Gurgaon
 - Developed a microservice(Promo System) over monolithic app which improved the experience, performance of customer cashbacks rewards by 50%. Automated the cashback rewarding process.
 - Automated the process for authorisation of loan underwriting by enhancing and developing Rule-engine microservice which reduced the manual auth from 70% to 32%. Produced multiple microservices that helped phasing out the monolith app to microservices architecture eg- Kyc- service , credit-bureau-service. Designed databases schemas for the microservices.
- 2019-06
- 2022-11

Software Development Engineer
Droom Technology, Gurgaon
 - Built a dynamic popup management panel from scratch, including gathering requirements, designing, developing, and end-to-end testing. Worked with JavaScript and NodeJS for the UI functionality and APIs, respectively.
 - Developed an Auth 2.0 microservice for the Droom Eco System using GO lang and Jason Web Tokens(JWTs). Used MySQL for token and client store.
 - Built a dealer management system for automobile dealers, including efficient and scalable APIs with unit testing. Provided automobile dealers with custom inventory uploading, automobile service packages, and deals.
- 2018-05
- 2018-07

Data Analyst Intern
Tata Steel, Jamshedpur
 - Built a **Hazard Prediction Model** using text mining techniques to determine the type of hazard based on the text description of the incident. Developed the model, gathered requirements and trained it. Worked with Python and R for the development of machine learning model, text mining, data analysis and visualization.
