

# VINODKUMAR

## DATA SCIENTIST

### PROFILE

- 3+ years of experience delivering AI-powered solutions, machine learning models, and advanced analytics to solve complex business challenges.
- Proficient in Python, SQL, NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn, NLTK, Statsmodels, Seaborn, MySQL, PostgreSQL, Power BI, AWS, GCP, Flask, and Django.
- Expertise in building and deploying Supervised Machine Learning models (Classification & Regression) and Unsupervised Learning algorithms (Clustering).
- Proven expertise in building machine learning models, automating support ticket resolutions, and developing lead scoring solutions with 95% accuracy.
- Adept at market mix modeling, statistical diagnostics, and early failure detection, reducing downtime by 15%.

### WORK EXPERIENCE

#### HCL Technologies Ltd (eTeam Info services Pvt. Ltd)

Data Science Engineer

Aug 2024 - Present

- Led the development and deployment of an AI-powered ticket resolution system in Microsoft Azure, automating the closure of support tickets and reducing response times.
- Implemented a Retrieval-Augmented Generation (RAG) architecture leveraging OpenAI GPT-3.5 Turbo via LangChain in Python to deliver intelligent and context-aware responses.
- Integrated Known Error Database (KEDB) and historical ticket data for accurate issue identification and automated resolutions.
- Designed and optimized prompt engineering strategies to enhance AI model performance for seamless ticket handling.
- Delivered measurable outcomes, including streamlined ticket resolution processes, reduced operational bottlenecks, and improved support productivity.

#### HiveMinds Innovative Market Solutions Pvt. Ltd.

Senior Data Specialist

Oct 2022 - June 2024

- Spearheaded the creation of a lead scoring model for an insurance company using Machine Learning algorithms, achieving a 95% accuracy rate.
- Conducted Cross-Parameter Impact and Trade-off Analysis to enhance model performance and accuracy.
- Developed Market Mix Models using Robyn and Lightweight MMM frameworks.
- Implemented Regression Analysis to gain actionable insights into market dynamics.
- Designed and deployed Power BI dashboards for effective data visualization.
- Conducted sentiment analysis by scraping reviews from platforms like Flipkart, Amazon, and Google Play Store.

### CONTACT

☎ +91 9949494228

✉ vinod.art44@gmail.com

### EDUCATION

2014

KLR college of engineering & Technology

- Btech in Electronics and Communication Engineering

### CORE COMPETENCIES

- Data Visualization
- Data Cleaning
- Data Extraction
- Machine Learning Lifecycle
- Natural Language Processing
- Deep Learning
- Data Pre-processing
- Market Mix Modeling
- Statistical Analysis
- Data Mining

### TECHNICAL SKILLS

- **Languages:** Python, & SQL
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, SciPy, SciKit-Learn, NLTK, Statsmodels, TensorFlow, Keras
- **Databases:** MySQL and PostgreSQL
- **Visualization Tools:** Power BI, Looker Studio
- **Cloud:** Amazon AWS, Azure, GCP
- **Frameworks:** Flask, Django

## SOFT SKILLS

---

- Communicator
- Reliable
- Negotiator
- Problem-solving
- Learner
- Creative Spirit

## CERTIFICATION

---

June 2020 - July 2021

- Post Graduate Program in Artificial Intelligence and Machine Learning Edureka

## LANGUAGES

---

- English
- Hindi
- Telugu

## PERSONAL DETAILS

---

- **Date of Birth:** August 15th, 1990
- **Address:** H. No.1-184, Nagineniprolu Burgampad, Bhadradri Kothagudem, 507114

## 9th Pixel Technologies India Pvt Ltd

Data Analyst

Oct 2021 - Oct 2022

- Developed a statistical diagnostic solution to detect oil sump failures in DE and NDE exciter gearboxes in mining equipment.
- Engineered features and created business rules based on operational data (temperature, vibration, pressure).
- Achieved early failure detection, reducing maintenance costs and improving equipment reliability.
- Reduced unplanned downtime by 15% through early detection of potential failures.
