Work Experience

RAZORPAY | Frontend Engineer

Aug 2021-Present

Merchant dashboard:

- Collaborated with designers and backend developers to implement user interfaces and integrated APIs by building a handful and easy to use path for merchants without going back and forth for queries which helped in decreasing traffic/dependency on backend
- Created Widgets that helps easy contactability to Merchant dashboard
- Involved in improving merchant experience by setting up more interactive UI in Care Pod.

Care & Admin-Dashboard:

- Developed a complete dashboard for New Merchant Activation[SOP] flow where admins can interact with merchant activation process at a single workplace and raise their clarifications
- Leading frontend initiatives for the Customer Support team at Razorpay
- Worked on revamp of Customer Support Help widget[contextual help section] which reduces duplicate tickets by 44%
- Collaborated with stakeholders, UX designers, BE developers to ensure all goals are met as per product timelines
- Revamped refunds related ticket-flow for care that reduced 60% of complete SV to this category

Customer Flow on Razorpay.com:

- Handled customer flow for easy query resolving and monitoring process
- Created a new grievance flow to escalate the customer grievance to the highest authority.(will be reducing volume for multiple tickets on same IDs)
