## Technical Skills

---

**Programming Languages:** Javascript, TypeScript, Python, Java, SQL, HTML, CSS

**Key Libraries:** React, Node.js, Express, Material UI, NumPy, pandas, Matplotlib, Scikit-learn

**Development Tools:** Design System, Elasticsearch, MongoDB, Git, GitHub, VS Code, Spyder, JupyterLab

## Work Experience

---

### Truestocks

Hyderabad, India

#### Founder

March 2023 - February 2024

- Led the **fintech startup** development from initial study, research, and concept ideation to early-stage execution.
- Directed a cross-functional **team of 3 members** to create user-facing features, including financial data visualization, trend projections, and community engagement tools.
- Innovated mathematical **strategies and models leveraging machine learning** to enhance predictive analytics and stock valuation accuracy.
- Developed an **AI-driven investment index** to benchmark the quantitative model against the existing indices, funds, and portfolio managers.
- Pitched the idea and **demonstrations to potential investors** to secure seed funding and drive startup growth.

### D.E. Shaw India Private Limited

Hyderabad, India

#### Member Technical

June 2020 - March 2023

- Integrated Open Source solutions with non-breaking migration strategies to **cut maintenance costs by over 90%** for complex React components.
- Transformed internal design system to Material UI, introducing **new components and highly configurable themes covering 80% of client use cases**.
- **Headed a team of 3** to overhaul the JS/TS project's documentation pipeline, implementing modular components for seamless setup and integration and automated production deployment.
- Improved a large-scale application's search by implementing an in-memory Trie solution, resulting in **60% faster fuzzy search** and notably higher true-positive results.
- Upgraded logging library to support MS SQL Server, enforcing schematic logging and **enhanced data analysis, visualization, and compliance capabilities for over 170 client applications**.
- Served as a **subject matter expert on web infrastructure and application search**, offering direct guidance and mentorship to clients as the primary point of contact.

### D.E. Shaw India Private Limited

Hyderabad, India

#### Tech Intern

January 2020 - June 2020

- Researched and developed innovative solutions for user **search optimization**, including session analysis, spell correction, query completion, and synonym detection.
- Built an advanced search portal leveraging Elasticsearch, featuring multi-level filtering and seamless GitHub integration for over **90 JavaScript/TypeScript libraries**.

### D.E. Shaw India Private Limited

Hyderabad, India

#### Tech Intern

June 2019 - July 2019

- Enhanced API doc hub search **accuracy from 65% to 96%** through rigorous research, data analysis, machine learning, data-driven tuning, and genetic algorithms.

## Relevant Work & Projects

---

### JSDoc3 website migration

<https://github.com/jsdoc/jsdoc.github.io/pull/237>

- **Open Source PR** for migrating the current website to the latest standard and feature-rich site with 0 breaking changes.

### Qwertypy

<https://pypi.org/project/qwertypy/>

- Open Source **PyPi library for financial utilities**, data analysis, and DSA boasting 100% unit test coverage.

## Achievements

---

- Best **global rank 646** and solved **1400+ questions** on LeetCode.
- **Winner at nationals** in Smart India Hackathon.

## Education

---

**BE - Computer Science & Engineering**

**August 2016 - June 2020**

Thapar Institute of Engineering and Technology
