Technical Skills

Languages: Javascript, Python, TypeScript, C, C++, Java

Databases: MySQL, MongoDB, Redis, Elasticsearch, Postgresql

Technologies: Node.js, React.js, Express.js, Jest, Angular, AWS, Django, Flask, Docker, GruntJs, Nginx, Kafka, Kubernetes

Concepts: Frontend & Backend Development, System Design (LLD & HLD), OOP, Serverless Development, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Database Normalization, Agile Methodology

Summary

Dynamic Software Development Engineer with **4+ years** of experience in developing **scalable and fault-tolerant** web applications using **Node.js, React.js, AWS**, and more. Proven ability to optimize **API performance and manage servers, successfully scaling** platforms to **support large user bases**. Experienced in agile methodologies and mentoring junior developers.

Experience

ZenTrades

Aug 2022 – Present

Software Design Engineer II – Node.js, React.js, Python, AWS, Elasticsearch, ELK, Redis, Docker

Pune, Maharashtra

- **AWS Pinpoint Campaign System:** Built a scalable **SMS and email campaign system**, boosting engagement by **50%** and capable of handling **50K** users, while mentoring two engineers.
- Exposed **Django APIs** for a **recommendation system** with **90%** accuracy, utilizing **LLMs** for **speech-to-text**, text **summarization**, and similarity search with **ChromaDB** and **vertex search**.
- **Data Migration & Serverless:** Built efficient data **migration scripts** and **serverless functions** on AWS Lambda using **Python**, achieving **90%** improvement in processing speed and scalability.
- Optimized API performance by implementing **caching strategies**, **minimizing database queries**, and **optimizing code**, achieving a **30%** reduction in response times.
- **Integrated QuickBooks (QBD & QBO)** to streamline financial workflows, ensuring seamless data synchronization and improved process efficiency.
- Developed a scalable search feature using **Elasticsearch**, optimizing performance to enhance accuracy and speed, resulting in a **60%** improvement in user experience and increased engagement.
- Built a **log monitoring system** with the **ELK stack (Elasticsearch, Logstash, Kibana)** to capture, analyze, and visualize front-end and server error logs, enabling real-time issue detection and resolution.

SmartServ

Jan 2021 – Aug 2022

Software Design Engineer I – Node.js, React.js, Python, AWS, MySQL, MongoDB, WebSocket

Pune, Maharashtra

- Optimized **lead generation** by streamlining service request submissions, boosting customer engagement by **25%**, and **integrating Zapier** to automate data flow, improving lead management efficiency by **40%**.
- Implemented security-focused development by optimizing **login flow**, implementing **Access Control Lists (ACL)**, adding **XSS protection** in the frontend, and resolving **JWT key issues**.
- Developed **real-time location tracking and analytics** using **WebSocket** and **Socket.io** for communication.
- Enhanced **database design** and corrected data flow for **reports**, specifically focusing on **MySQL**. Improved query efficiency by **50%**, ensuring faster and more responsive reporting capabilities.
- Enhanced **invoice calculation** logic for global tax compliance. Developed a **Node.js module (NPM package)** to centralize billing, ensuring **100%** identical functionality across Web, Android, and iOS platforms.
- Optimized **video compression** using **FFmpeg** on **AWS Lambda** and Stream, integrated with **AWS CloudFront** and **Lambda@Edge**. Achieved **40-70%** efficiency improvement by utilizing **AWS Lambda power tuning** for cost-effective.

Projects

Scale websocket using a load balancer and redis | Node.js, Websocket, Redis Pub-Sub, HAProxy, Docker | [link](#)

- Designed and implemented a **real-time communication system**, optimizing traffic management and ensuring seamless scalability.

Education

DHARMSINH DESAI UNIVERSITY

B.Tech in Computer Engineering (CGPA - 8.1)

May 2021

Nadiad, Gujarat
