Technical Skills

- Microsoft Fabric
- Pyspark and Spark SQL
- Data Factory
- Synapse Analytics
- Snowflake SQL and SQL
- Azure storage and ADLS
- Azure Key Vault
- Data Architectures

Certifications

- Microsoft Certification DP-203 [Microsoft Azure Data Engineer]
- Microsoft Certification DP-200 [Azure Data Engineer Associate]
- Microsoft Certification DP-201 [Designing an Azure Data Solution]
- Microsoft Certification 70-475 [Designing and Implementing Cloud Data Platform Solutions]
- Microsoft Certification 70-533 [Implementing Microsoft Azure Infrastructure Solutions]

Languages

- English
- Tamil

Summary

Technical Lead with 15 years of expertise in Azure data engineering, specializing in ELT/ETL processes, cloud migration, and advanced analytics. Demonstrated success in leading multi-industry projects that modernize data infrastructures using Microsoft Fabric, Azure Data Factory, PySpark, Snowflake, and SQL. Skilled in designing scalable data pipelines and deploying efficient solutions that drive business value and operational excellence

Work Experience

Associate Consultant

TCS, Bangalore

June 2022 - Current

- Analyzed client requirements to develop tailored solutions and consulting strategies.
- Collaborated with cross-functional teams to enhance project execution and delivery.
- Facilitated workshops and meetings to gather insights and drive stakeholder engagement.
- Created documentation and reports to communicate project progress and findings.

Manager

CTS, Coimbatore

April 2018 - June 2022

- Oversaw staff training programs to develop crucial skill sets and knowledge.
- Coordinated cross-departmental communication for project alignment and efficiency.
- Developed and maintained schedules to optimize resource allocation effectively.

Module Lead

Mind Tree, Bangalore

June 2015 - April 2018

- Streamlined project timelines and resource allocation for various client deliverables.
- Enhanced coding skills and efficiency by mentoring junior developers.
- Established best practices for Agile methodologies across project teams.

Problem-solving Abilities

Possessing strong analytical skills and an ability to solve complex problems

Teamwork and Communication

Proficient teamwork skills and a commitment to maintaining healthy workplace communication

Successful Project Leadership

Successfully led migration projects for various industries including healthcare and logistics using Azure technologies

Software Engineer

Robert Bosch, Bangalore

Feb 2011 - June 2015

- Managed maintenance and support for Employee Service System with 46 web applications.
- Conducted requirement analysis and design discussions to enhance application functionality.
- Developed enhancements for applications, improving user experience and efficiency.
- Created unit test cases to ensure application quality and reliability.
- Provided UTA support and executables for successful production releases.

Projects

Electric Power Product ETL

Data Migration and ETL for electric power product production and sales

- Migrated data from on-premises sources to Azure cloud and developed ETL processes
- Managed complete infrastructure deployment and pipeline scheduling

Healthcare ETL Solutions

Data Analysis and ETL for Health Care

- Developed data pipelines for healthcare applications
- Assisted in monitoring and troubleshooting data-related issues

Electronic Products Data Visualization

Data Analysis and Visualization for Electronic Products

- Created visual monitoring and reports for electronic product sales
- Implemented data pipelines and infrastructure for the analysis

Logistics ETL Solutions

Data Migration for Logistics and Cargo Services

- Migrated logistics data to Azure cloud and ensured ETL processes for dispatch details
- Built complete infrastructure and application layer

Travel ETL Solutions

Data Migration for Travel and Hospitality

- Created efficient data pipelines for travel and hospitality applications
- Ensured successful migration of visitor data and real-time analytics
