

SUMMARY

- A self - starter engineer with ability to work in a fast-paced environment with experience handling multiple priorities and ability to work extended hours.
- Expert in a wide range of customer relations services, collecting and analyzing data.
- Excellent verbal, interpersonal and communication skills.
- Experienced HL7 analyst using interface engines such as OPEN Link, FSI, and Mirth connect.
- Expertise in requirement gathering, analysis, design of functional and specification documents to meet the business need.
- Experience developing, testing, troubleshooting, deploying interfaces to various environments, implementation and support.
- Hands on experience building interfaces using integration engines like OPENLINK, FSI, and Mirth connect.
- Proficient in various software development life cycle (SDLC) methodologies used in healthcare integration.
- Expertise building real-time, batch and file transfer interfaces for ADT, ORM, ORU, RDE, DFT, SIU, MDM transaction types.
- Experience working on and configuring message transfer protocols including TCP/IP, FTP, SFTP, http/https etc.
- Proficient in performing Unit testing, System testing, Integrated testing, Regression testing and assisting with UAT.
- Experience with the change management process for implementation of interfaces,
- Strong understanding and hands on experience working with HL7 V2.x (traditional version)
- Hands on experience using application like Change gear for generating and resolving tickets as well as defect tracking.
- Ability to multitask including managing multiple projects, prioritizing and ensuring on time delivery of all projects.

WORK EXPERIENCE

Software Engineer

Oracle Cerner | Bengaluru | 2022 – Present

- Built new interfaces, maps and modified existing maps using OPEN Link, and FSI.
- Worked ADT, ORM, ORU, DFT, MDM and SIU message types.
- Built brand new HL7 interfaces (Design, build, test and deployment).
- Participated in Monitoring the error queues, logs, traces and resolving failed messages and providing support.
- Maintaining all the translation tables (e.g.: patient type, class, race, language, ethnicity etc.). Supported ancillary upgrades and service packs, making changes to existing interfaces in integration engine to meet the needs of the upgrades.
- Provided interface support for the development and implementation of interfaces between hospital systems and Physician Clinic Electronic Medical Record systems.
- Having the ability to perform preliminary investigation of interface-related issues identified during the implementation phase and has the ability to search for, and edit HL7 messages through Interface Admin.
- Provide excellent customer service and maintained excellent customer relationship both internal and external stakeholders.
- Familiar with tool such as MS VISIO for creating a data flow documentation.

Intern

Symphony Retailai | Bengaluru | 2021 – 2022

- Have a good experience in SQL server Management studio.
- Modified the existing Stored Procedures when it's required from the client.
- Tested new features in Production stage.

SKILLS

- **HL7:** V2.x, V3.0
- **Integration engines:** OPEN Link, Open engine, Basic Mirth connect, and Basic Cloverleaf.
- **Scripting languages:** Python, SQL, SQL server.
- **Message transfer protocols:** TCP-IP, VPN, SFTP, FTP, and HTTP/HTTPS
- **Microsoft Products:** Word, Excel, PowerPoint, Visio.
- **IDE:** PyCharm, Postgres, SSMS, MySQL.

EDUCATION

Name of College: Sambhram Institute of Technology

Degree: Bachelor of engineering

CGPA: 7.41

Year of Pass out: 2020

City, State: Bengaluru, Karnataka

Name of College: Government PUC College

Percentage: 69

Year of Pass out: 2016

City, State: Mandya, Karnataka

Name of College: Manasa High School

Percentage: 86

Year of Pass out: 2014

City, State: Bengaluru, Karnataka

PERSONAL PROJECTS

Hotel Database Management

Objective: The project "Hotel Management System" is aimed to develop to maintain the day-to-day state of admission/Vacation of Residents, List of Workers, payment details etc. Technologies Used: RDBMS(MySQL), PHP (front end).

Login Registration Page

Objective: The project "Login and Registration page " is done for my knowledge purpose. Technologies Used: Python, PostgreSQL, Django
