Summary

Data Engineer with 3+ years of experience building and operating production ETL pipelines and analytics platforms using Python, SQL, AWS, and Airflow, delivering reliable datasets for BI and data-driven decision-making.

Skills

Languages: Python, SQL, Bash

Data Engineering: ETL/ELT, Incremental Loads, Partitioning, Data Validation, Performance Tuning

Cloud & Orchestration: AWS (S3, Glue, Redshift, Lambda), Apache Airflow, Azure Data Factory (exposure)

Modeling & Warehousing: Dimensional Modeling, Star Schema, Data Marts

Databases & Tools: PostgreSQL, SQL Server, ClickHouse, Power BI, Docker, Git, CI/CD, Linux

Experience

Data Engineer

Jan 2025 – Present

StakerDotFun, Dublin

Python, SQL, Cloud

- Built and maintained production Python/SQL pipelines delivering trusted datasets for analytics and reporting.
- Optimised transformations and query patterns, reducing processing time by 35%.
- Implemented data validation and reconciliation checks to improve accuracy and reliability.
- Delivered KPI-aligned Power BI semantic models and dashboards for stakeholders.

Data Scientist Intern

Jun 2024 – Dec 2024

Orcawise, Dublin

Python, SQL, AWS

- Built API ingestion pipelines, landing data in AWS S3 and loading curated tables into Redshift.
- Standardised schemas and transformations to produce analysis-ready datasets for BI.

Data Engineer

Sep 2019 – Jul 2022

Wipro, Bangalore

AWS, Airflow, Redshift

- Designed and operated ETL pipelines using AWS Glue, Airflow, and Redshift for enterprise analytics.
- Implemented incremental loads and optimised SQL, reducing pipeline cycle time by 25%.
- Built dimensional models and data marts to standardise KPI reporting.
- Delivered automated Power BI datasets, reducing reporting turnaround by 40%.

Projects

ChainFlow Lite - Analytics Pipeline

Python, Airflow, ClickHouse

- Built automated Airflow pipelines ingesting transaction data into ClickHouse for analytics.
- Modeled wallet-level metrics and delivered Streamlit dashboards for trend analysis.

DeFi Metrics ETL Pipeline

Python, SQL, PostgreSQL

- Designed end-to-end ETL pipelines processing multi-year datasets for analytics use cases.
- Loaded structured data into PostgreSQL and exposed metrics via Streamlit dashboards.

Certifications

AWS Certified Cloud Practitioner — Google Data Analytics — IBM Data Analytics

Education

MSc Computer Science, University College Dublin

2022 – 2023

B.Tech Computer Science, SRM University

2016 – 2020
