vijaysinh.b.shekhawat94@gmail.com

Python Developer with Nearly 5 years' experience building scalable Django and Flask applications. Experienced in Generative AI integration for intelligent, user-focused platforms across e-commerce, ed-tech, travel, and media. Currently focusing on cloud-native solutions and advanced AI-driven backend systems to drive innovation and business growth.

Core Competencies

Backend development with Django, DRF, and Flask

Generative AI on AWS

API Design & Integration

Device & Hardware Integration

Database Management and Data Modeling (MySQL)

Agile Collaboration & End-to-End Delivery

Automation of Workflows and Process Optimization

Profile Summary

- Versatile Python Developer with an experience specializing in **scalable backend development** using Django, Django REST Framework, and Flask.
- **Expertise in cloud-native AWS applications**, including serverless architecture with Lambda, DynamoDB, and Cognito.
- **Skilled in integrating Generative AI solutions** like Anthropic Claude LLM and Amazon Kendra for intelligent, user-centric platforms.
- Proficient in designing RESTful APIs, managing databases (MySQL, Microsoft SQL Server), and automating workflows to **boost efficiency**.
- Increased feature **delivery speed by 20%** through **modular design** and **reduced bug backlog by 30%**, improving **system uptime to 99.9%**.
- **Delivered 15+ REST APIs** improving customer onboarding speed by 25%, and **reduced manual processing time by 50%**, saving **10 hours weekly**.
- Strong **problem-solving**, communication, and collaboration skills; effective in agile teams and end-to-end project delivery.

Work Experience

GlobalLogic

Senior Software Engineer | May 2023 – Present

Roles & Responsibilities :

- Spearheading multiple end-to-end project deliveries, from inception to post-go-live experience.
- Leading end-to-end development activities while managing more than 18 Software Engineers, including Development and QA, to deliver on organizational objectives, develop & execute project plans, and delivery commitments
- Orchestrating cloud deployment and scaling strategy using automated CICD and DevOps; working on various stages of CI/CD pipeline for complete automation from perforce checkout to deployment stage
- Participating in product vision; collaborating with Executives and Product Management Teams for meeting the business and engineering objectives
- Fostering a culture of continuous improvement, collaboration, and accountability
- Building close working relationships with internal & external stakeholders regularly to fulfil their requirements
- Driving best practice – including Agile & best-practice methodologies
- Practicing Agile & Scalable Agile, and continuous integration approach
- Resolving product issues, performed root cause analysis, and rendered customer support on some issues
- Enabling the team to execute high-velocity software development, support their needs and resolve conflicts

Technical Skills

- **Programming**
Languages: Python, Java, C (Basic), PHP, HTML, JavaScript, AJAX, JSON
- **Frameworks & Libraries:** Django, Django REST Framework, Flask
- **Cloud & Serverless:** AWS (Lambda, S3, EC2, DynamoDB, Cognito, Kendra, IAM)
- **Version Control:** SVN, Git
- **API Development:** RESTful API design and implementation
- **Generative AI / NLP:** Anthropic Claude LLM, Amazon Kendra
- **Tools & Platforms:** Postman, PyCharm, Redrat IR Blaster

Soft Skills

- ⌚ Analytical Thinking
- ⌚ Effective Communication
- ⌚ Team Collaboration
- ⌚ Adaptability
- ⌚ Time Management
- ⌚ Ownership & Accountability

Personal Details

- ⌚ **DOB:** 1st January 1994
- ⌚ **Languages:** English, Hindi, Marathi
- ⌚ **Address:** Umarkhed, Yavatmal, Maharashtra - 445230

⌚ **Project 1: Anaplan Experience Engineering**

Client: Anaplan

Built new Python-based features for a cloud-driven business planning platform. Improved backend performance and maintained complex financial logic systems.

⌚ **Project 2: Generative AI Chatbot (POC)**

Client: Teaching Strategies, USA

Developed a Generative AI chatbot using AWS Lambda, Cognito, DynamoDB, and Amazon Kendra. Integrated Anthropic Claude LLM for intelligent NLP and search.

⌚ **Project 3: Discovery Digital Media Streaming**

Client: Discovery Digital

Integrated streaming devices (Apple TV, Android STBs, HDMI) and configured Redrat IR Blaster for automation. Led system testing and ensured seamless motion detection workflows.

⌚ **Project 4: Alteryx Data Platform Integrations**

Client: Alteryx Inc.

Integrated Tableau, Salesforce, Google Drive, SharePoint, and Azure connectors within Alteryx, streamlining ETL pipelines and data validation.

IGT Solutions Pvt. Ltd.

Software Engineer | July 2021 – Jan 2023

⌚ **Project 1: FareNoteInterpreter (FNI)**

Clients: Expedia, Sabre, TripActions, Lufthansa

Developed Django backend modules to process airline fare rules and cancellation policies. Built REST APIs, models, and serializers; participated in Agile ceremonies and SVN-based version control.

Freelance Software Developer – HW Wellness

Full Stack Developer | Oct 2019 – June 2021

⌚ **Project 1: In-House E-Commerce Platform**

Client: HW Wellness (True Elements)

Designed a Django-based e-commerce solution with order automation, BOM module, recipe tracking, and inventory reports. Automated Excel-based data ingestion and backend processing.

HW Wellness Solutions (True Elements)

Technology Associate | Nov 2018 – Sep 2019

⌚ **Project 1: Inventory & Order Automation System**

Built tools for inventory tracking, order processing, recipe management, and quality control. Implemented reporting scripts and backend logic using Python, Django, MySQL.

Education

⌚ **Master of Computer Applications (MCA)**

Pune University (2015 – 2018)

⌚ **Bachelor of Computer Applications (BCA)**

Amravati University, Maharashtra (2011 – 2014)

Achievements

- ⌚ Awarded 1st prize for excellence in Object-Oriented Analysis and Design (OOAD) by creating UML diagrams.
- ⌚ Received appreciation and a prize for the final year project on sentiment analysis of product reviews and tweets using machine learning with the NLTK (Natural Language Toolkit) library.
