PROFILE SUMMARY

Achievement-driven professional with an experience of more than 7 years.

- Experience in architecting applications with Algorithms, Data Structures, Data Analysis, Business Analysis, Machine Learning, MySQL, Python, Power BI, NLP,
- Skilled in libraries such as NumPy, Pandas, Matplotlib, Seaborn, Power BI for Data Visualization.
- Expertise in manipulating and analyzing complex, high-volume, high-dimensionality data from varying data sources and big data sources.
- Gained exposure in project management and understanding business issues and data challenges, identifying strengths and weaknesses, and reviewing and editing requirements, specifications, and business processes.
- Exposure in engaging and coordinating Data Analysis sessions for analyzing information system needs, evaluating end-user requirements, designing customized solutions and troubleshooting for complex information systems management.
- Enriched experience in managing Business Testing Life Cycle involving managing test scenarios, designing test case, reviewing & executing test case, test results reporting and defect reporting and tracking.
- Strong process orientation approach coupled with effective communicator with excellent analytical, problem solving, organizational abilities with a flexible attitude.

EDUCATION

Full Stack Data Science Program

SkilledUp.tech Jan'24 to Present Noida, IN

Bachelor of Commerce

University of CCS [July '10 - Aug '13] Meerut IN

- Secured 54.6%

PROFESSIONAL EXPERIENCE

Data Analytics – Senior Associate

Optum Global Health [July '18 - Present] Gurgaon, IN

KEY Result Area

- Conduct thorough analysis of large datasets to derive actionable insights.
- Develop and implement data models, algorithms, and statistical tests to solve complex business problems.
- Interpret data trends and patterns to inform strategic decision-making processes.
- Generate comprehensive reports and dashboards using data visualization tools such as Power BI, Looker Studio or Python libraries like Matplotlib and Seaborn.
- Ensure reports are clear, concise, and tailored to meet the needs of various stakeholders within the organization.
- Establish and maintain data quality standards to ensure accuracy, completeness, and consistency of data across all systems.

- Implement data validation techniques and perform regular audits to identify and rectify data discrepancies or anomalies.
- Develop predictive models and algorithms to forecast business outcomes, customer behavior, or market trends.
- Evaluate model performance and refine methodologies to improve predictive accuracy and reliability.
- Stay abreast of emerging trends, technologies, and best practices in data analytics and related fields.
- Proactively enhance technical skills and domain knowledge through training, self-study, and participation in professional development activities.
- Collaborate with other departments such as marketing, finance, and operations to understand their data requirements and provide analytical support.
- Communicate findings and recommendations effectively to non-technical stakeholders, facilitating data-driven decision-making across the organization.
- Manage multiple projects simultaneously, adhering to timelines and delivering high-quality results within budget constraints.
- Prioritize tasks effectively, balancing short-term deliverables with long-term strategic objectives.
- Analyze customer data to uncover insights into preferences, behaviors, and buying patterns.
- Conduct market research and competitor analysis to identify opportunities for growth and differentiation.

MIS-Associate

Exl Service India Pvt Ltd [July 15-feb2018] **Noida, IN**

KEY Result Area

- Communicate findings and recommendations effectively to non-technical stakeholders, facilitating data-driven decision-making across the organization.
- Manage multiple projects simultaneously, adhering to timelines and delivering high-quality results within budget constraints.
- Prioritize tasks effectively, balancing short-term deliverables with long-term strategic objectives.
- Analyze customer data to uncover insights into preferences, behaviors, and buying patterns.
- Conduct market research and competitor analysis to identify opportunities for growth and differentiation.

KEY Skill

- Data Analysis • Business Analysis • Stakeholder Management • Project Management • Quality Assurance • Data Mining
- Leadership & Training • Process Improvement • Team Incubation • Data Visualization

TECHNICAL SKILLS

Language /Database: - MySQL, Python, Power BI, Looker Studio
MS Excel: - Advance
Platforms and Misc.: Anaconda, Jupiter Notebook

HIGHLIGHTS

Executed many internal projects as Data Analyst with using tools such as Looker Studio and Power BI for Data Visualization Recognized by managers, colleagues, and peers for innovation, communication, and teamwork to ensure quality, timely project completion

PERSONAL DETAILS

Date of Birth	:	11-10-1995
Linguistic Abilities	:	English and Hindi
Address	:	173, St. No-4 New Goupuri Ghaziabad Ghaziabad 201009 (UP)

CERTIFICATES

- Advanced excel Diploma from NCC Academy.

Place.....
Date.....

Name: -
