EDUCATION

- **Indian Institute of Technology, Hyderabad** Hyderabad, India
B.Tech in Engineering Science; *July. 2016 – April. 2020*

EXPERIENCE

- **Coinswitch** Bangalore, India
Backend Engineer *Jan 2022 - Present*
 - **Auth-Service:** :
 - * Developed and enhanced an authentication and authorization service in Go, including a Multi-factor Authentication (MFA) feature for secure login/signup and critical account access.
 - * Successfully refactored the service to significantly improve performance, achieving a 65% reduction in latency for critical APIs.
 - * Strengthened the service's resilience by addressing security loopholes and resolving Go-Routine spikes.
 - **Crypto: Staking Service:** :
 - * Led the end-to-end development of a staking service, working closely with the Business and Product teams, from conception to delivery.
 - * Built the service from scratch using Go and Gin Framework, leveraging SQS and Lambda to fulfill product requirements. Deployed it on Kubernetes, enabling users to earn passive income by staking their Crypto holdings.
 - **Indian Stocks: Kyc Service:** :
 - * Developed a multi-tenant KYC service for different assets, with a focus on Indian Equities. Built KYC feature for indian equity from scratch, and leveraged Flowable Workflow Engine to achieve a server-driven UI, where the backend controls all screens.
 - * Successfully deployed the service on both ECS and EKS, ensuring data segregation based on asset classes.
 - **Super-App:** :
 - * Played a key role in the restructuring of Coinswitch's AWS account and service migration, facilitating the company's transition into a wealth-tech company.
 - * Implemented data segregation, compliance, and legal requirements through multi-deployment strategies, ensuring the separation of data among different asset classes and maintaining regulatory compliance.
- **Oplus(Oppo+Oneplus)** Hyderabad, India
Software Engineer *Sept 2020 - Jan 2022*
 - **Network:** .
 - * Contributed to flagship projects, including Nord and Reno series, by resolving network (calls and data) issues/bugs for both market-released and non-released devices. Additionally, played a key role in OS upgrades for Android R and Android S, ensuring seamless transitions and improved performance.
 - **IMS:** .
 - * Worked on IMS protocol setup and enablement for Oppo and Oneplus devices in Asia and Europe. Ensured seamless delivery of multimedia communication services (voice, video, and text messaging) over IP networks, collaborating with regional operators and vendors.

PROJECTS

- **Multiplayer game platform:** Implemented the concurrency part of the game using C++, a multithreading library. The main aim of this project was to showcase the use of concurrency and increase the efficiency using thread pool..
- **CTS/GTS/VTS testing tool:** At Oplus whenever there is a security patches upgrades, we need to perform all types of compatibility tests manually, so I made an application which can be installed on the device and reflects the results.
- **News Android App:** Have made an Android for the latest news using API and RecyclerView in Android Studio, which works as well as many other apps in the market.

PROGRAMMING SKILLS

- **Languages:** Go, Python, C++, SQL **Technologies:** AWS, Serverless, Event-Driven Architecture, Microservices, Distributed Systems, DynamoDb, RDS, S3, SQS, ECS, EKS, Docker and CI/CD
