

Name Vikas kumar

Role Senior Android Engineer | Kotlin | Jetpack Compose

Email heldbythelight2026@gmail.com

Mobile +91 9581696037, **India**

EDUCATION

NIT Warangal B.Tech In Computer Science & Engineering

Grade: 6.33/10, June 2010 - June 2014

Relevant coursework Problem Solving in Java, Data Structures and Algorithms, Discrete Mathematics, Operating Systems, Computer Networks

Skills:

Android, Kotlin, Jetpack Compose, Coroutines, Flow, MVVM, Clean Architecture, REST APIs, Firebase, Google Maps, Performance Optimization, Git

Experience

Paytm For Business, Noida

Senior Software Engineer (June 2022 - July 2024)

- Led development and performance optimization of core Android features; conducted code reviews and enabled cross-team knowledge sharing.
- Built critical components including full-screen notifications during device sleep, payment alert widgets, and in-app popup management.
- Resolved major stability issues such as home-page ANRs and improved language data synchronization.
- Managed dynamic feature rollout and configuration using Firebase Remote Config.
- Designed production-ready UI components using Jetpack Compose, applying state management, recomposition, and navigation to support gradual UI modernization.

Dehaat (Green Agrevolution) Gurugram (Nov 2021 - May 2022)

Software development Engineer (Android)

- Integrated Prakshep satellite mapping for farm listings and notifications.
- Utilized Google Maps Android API's Polygon feature (or a similar mapping library) to highlight farm boundaries with polygons based on latitude and longitude.
- Identified and resolved hidden bugs to improve app stability and performance.

Freecharge Payments, Gurugram (April 2020 - Feb 2021)

Software development Engineer (Android)

Developed a new module for the existing Freecharge Merchant Android App, used by internal agents to digitally collect documents, verify KYC, onboard merchants, and sell subscriptions.

Nagarro Softwares, Gurugram (Sept 2018 - Jan 2020)

Senior Technical Associate (Android)

- Worked on the Nedbank South Africa Android app, building several features.
- Developed a POC that helped secure a new contract for the company.

Goambee @ 1st Consult Technologies, Bengaluru (July 2017 - Jan 2018)

Software development Engineer (Android)

- Developed an Android app with a corporate-owned, single-use (COSU) solution for ambulance crews.
- Created a biometric attendance module with fingerprint authentication and randomized checks for crew roles.
- Attendance records sync to the server whenever online.

Anvaya Analytics, Bengaluru - (May 2016 - May 2017)

Software Engineer

- Consumer-Business Engagement Solution: Developed a consumer and store app. The consumer app allows users to find nearby stores and receive customized offers and

rewards. The store app helps record consumer experiences and manage rewards.

- Doctor-Patient Interaction Assistance: Developed an app for patients to book video or physical appointments with specialists. Doctors can post schedules, confirm appointments, and record notes.
- Consumer App:
https://play.google.com/store/apps/details?id=io.pika.pika_consumer.production.loyalty
- Store Staff app - :
<https://play.google.com/store/apps/details?id=io.pika.staff>

Riktam Technologies, Hyderabad - July 2014 - June 2016
Software Engineer

- Developed a travel guide app with audio, text, and offline maps.
Travel Guide App:
<https://play.google.com/store/apps/details?id=com.captivatour.captivatour>
- Created a wholesale consumer and vendor app with item management and purchase confirmation features. Wholesale Consumer Assistance and Vendor App:
<https://play.google.com/store/apps/details?id=com.riktamtech.salespersondemo>
- Developed a television program guide app for Digicel.

Early Achievements

District Topper (Class 10 Board) | AIEEE 2010 – AIR 2151
