EDUCATION

B.E. in Computer Engineering

Thapar University

CGPA: 8.16/10

07/2018 – 06/2022

Patiala, India

PROFESSIONAL EXPERIENCE

Frontend Engineer

CRED

10/2023 – present

Bangalore

- **Inspection Tracking:** Revamped Vehicle Inspection Tracking screen for CRED **Garage**.
- **CS360:** Developed a **platform** for **Customer Support** agents where everything related to the user would be present, be it orders, tickets, refunds, cards, rewards, etc.

Senior Software Engineer

AmbitionBox (Naukri.com)

06/2023 – 10/2023

Noida, India

- **AmbitionBox App:** Developing a new **React Native app** from the ground up, leveraging the power of **React Native Web** to enable code sharing between the React Native app and **NextJS web** platform in a **monorepo**.
- **AmbitionBox Feed:** Implementing a new module serving as a **community-based discussion platform** for users to engage in topic-driven conversations.

Software Engineer

AmbitionBox (Naukri.com)

06/2022 – 05/2023

Noida, India

- **Employer Branding Score:** Introduced EBS tab in B2B for Employers, where **employers could showcase their brand**. One of the major step towards **generating revenue**.
- **Core Web Vitals:** Fixed layout issues sitewide which led to **50-60% decrease in CLS**.
- **Landing Page:** Collaborated in revamping AmbitionBox's homepage under the new **Design System**, which led to downfall in bounce rate by **30%**.
- **Company Location Pages:** Introduced new module for company offices, which would help in **boosting SEO performance of Offices and Overview Pages**.

Software Engineer Intern

AmbitionBox (Naukri.com)

01/2022 – 05/2022

Noida, India

- **Compare Companies:** Developed a platform where users can compare two companies on the basis of 27+ workplace factors, currently having a user traffic of **1.5Lakh+ users/month**.

Software Engineer Intern

MakeMyTrip

05/2021 – 12/2021

Gurgaon, India

- **AltAcco Trending:** Successfully implemented a platform for Hotels/Homestays funnel, which shows Top5 cities's homestays to users.
- **TypeScript POC:** Converted Hotels's Tracking System from JS to TS with 97% efficiency.

PROJECTS

Urban Wolves [🔗](#)

GITHUB REPO [🔗](#)

A full fledged **E-Commerce** DT-PWA application for Clothing Category, developed using **ReactJS-Redux**, connected to **Firebase's** database. For realistic payment experience, I have also integrated **Stripe** services.

EatMe [🔗](#)

GITHUB REPO [🔗](#)

A **cross-platform Food Delivery** application for the quickest and smoothest delivery of your favourite food items. I have also integrated **Google Maps API** for live tracking of your food order.
