+ ABOUT ME

Experienced Software Engineer with a demonstrated history of working in the Omni-Channel landscape. Skilled in Javascript, HTML, CSS, React.js, Redux with around 4+ Years of hands-on experience in each technology. Strong information technology professional with a Bachelor's Degree focused in B.Tech in Computer Science & Engineering.

+ EDUCATION

- Shri Mata Vaishno Devi University
Katra, J&K
2019
BACHELOR OF TECHNOLOGY

Computer Science
 - Machine Learning
 - Operating Systems
 - Networking
 - Algorithms
 - Programming with C

+ SKILLS

- **Programming**
Javascript (ES5 & ES6+), Python, HTML, CSS

Framework & Libraries
React, Redux, Styled Components

Testing Framework
Jest & React Testing Library

Tools & PlatForms
Git, Webpack, Babel, Figma, Storybook

Others
Adobe Experience Manager(AEM), Sanity.io, Next.js, TypeScript, Object Oriented Programming (OOP), Data Structures & Algorithms, CI/CD, ESLint, Node.js, Progressive Web Applications (PWA)

+ WORK EXPERIENCE

- Dew Solutions Pvt Ltd. FEB 2020 - NOV 2023
Gurugram
SOFTWARE ENGINEER
 - Led the development of **Tata Neu's** core feature, i.e., NeuPass-Lite, which was successfully launched at the event of the **Indian Premier League (IPL) 2022**.
 - Contributed significantly to the development of Tata Neu's Insurance, Rewards & Benefits, My Orders & Homepage team.
 - Proficiently collaborated with React and AEM (Adobe Experience Manager) to optimize content management, ensuring seamless integration and performance enhancement.
 - Transitioned towards leveraging advanced CMS capabilities, adopting Sanity.io with Next.js framework, driving a significant improvement in content management and website performance metrics.
 - Worked on a *micro-frontend* architecture, contributing to the development of a library for reusable components, enhancing modularity and scalability across multiple projects.
 - Utilized *Google Lighthouse* Insights to identify bottlenecks and meticulously fine-tune frontend code, achieving a 90+ score for both mobile and desktop on performance benchmarks.
 - Test coverage across the main application via unit (Jest/React testing Library) testing, thus reducing bugs.
- UEX (Maktech) JUL 2019 - OCT 2019
Bangalore
SOFTWARE ENGINEER
 - Led initiatives to boost application performance by implementing advanced state management techniques in React, particularly leveraging the Context API.
 - Executed performance enhancements through the strategic implementation of lazy loading resources, resulting in significantly reduced initial load times.
 - Elevated overall user experience by optimizing website loading times through meticulous frontend optimizations.
 - Collaborated seamlessly with design and backend teams to deliver functional solutions, ensuring cohesive results aligned with project objectives.

+ PROJECTS

- **Shop with Vikrant (SWV) - An Ecommerce Web App for fashion needs.** Skills - React, Redux, SCSS
 - Utilized selector function approach to optimize the rendering process, reducing unnecessary re-calculations.
 - Integrated Stripe payment system.
- **MindSchool - Online Learning App for Re-Inventing Yourself.** Skills - React, Javascript
 - Built using React and Redux with a modular code structure.
 - Utilized tools like webpack, babel etc.

+ CERTIFICATIONS

- **PROBLEM SOLVING**
Algoexpert - Ace the coding interview

PROGRAMMING
JavaScript: Understanding the Weird Parts

+ ACHIEVEMENTS

- - Secured 2nd position in Titiksha TechFest Coding challenge 2019.
- Solved 100+ problems on leetcode
- Built a Home Made Tiffins delivery app for the hostel students with 20+ orders a day.
