

VIKRANT SIWACH

AI Architect | Enterprise & AI Transformation Consultant

E-mail: vikrant.siwach@gmail.com

Phone: +91-9560879722

Location: Faridabad, Haryana, India

LinkedIn: [linkedin.com/in/vikrant-siwach](https://www.linkedin.com/in/vikrant-siwach)

PROFESSIONAL SUMMARY

Enterprise AI Architect and technology leader with **14+ years of experience** designing and delivering **large-scale enterprise software systems**, complemented by a **Master's degree in Artificial Intelligence & Machine Learning** with specialization in **Natural Language Processing**.

Specializes in **AI-enabled enterprise transformation**, solution architecture, and delivery leadership across complex, multi-stakeholder environments. Proven ability to translate business challenges into **scalable, production-ready AI and digital solutions**, balancing innovation with reliability, governance, and operational constraints.

Experienced in client advisory, architecture governance, and execution ownership, with a strong background in **MEAN, automation, and intelligent systems**.

CORE CAPABILITIES

- Enterprise & AI Solution Architecture
- Digital & AI Transformation
- Delivery & Engagement Leadership
- Legacy Modernization & Integration
- Team Leadership & Capability Building

TECHNOLOGY & PLATFORMS

AI / Data

Applied Machine Learning, AI System Integration, Intelligent Automation, Validation & Analytics, Model Evaluation, Monitoring, Production Readiness

Architecture & Platforms

Enterprise & Solution Architecture, Distributed Systems, Edge Computing, IoT, Windows, Android, iOS

Frontend / Application Technologies

React, Angular, EmberJS, TypeScript, JavaScript, HTML, HTML5, CSS, SCSS, LESS, Tailwind, Bootstrap, jQuery, SPA Architecture, Modular UI Design, Responsive Web App, Progressive Web App, Hybrid Mobile Apps(Ionic, Corodova/Capacitor), Selenium Automation

Backend / Integration

Node.js, Python, Java, SQL, Mongo, Express, REST APIs, Data Pipelines, Microservices, Message Bus, RabbitMQ, P2P communication, Node Federation, Scheduling & Optimizations.

DevOps / Delivery

CI/CD Pipelines, Release Governance, Agile / Scrum, Scaled Delivery, Quality Engineering & Automation

Tools & Ecosystem

Git, BitBucket, Confluence, Jenkins, AWS, Azure, ChatGPT, Gemini, Node4J, nVidia AI Workbench

PROFESSIONAL EXPERIENCE

Lead Product Engineer / Scrum Master

Barco Electronics | Feb, 2023 – Dec, 2025

Led architecture, delivery, and execution across strategic enterprise products, combining **AI-driven innovation, enterprise reliability, and agile delivery leadership**.

SlideRight QA (AI-Driven Quality & Validation Platform)

- Lead Product Engineer for an **AI-enabled quality assurance platform**, driving intelligent validation, automation, and system reliability.
- Architected and delivered **AI-driven quality workflows**, reducing manual validation effort by **~30–40%** across targeted workflows.
- Partnered with stakeholders to identify high-impact AI use cases and ensure **robust, production-ready implementations** with validation, monitoring, and controlled rollouts.
- Led integration of AI capabilities into existing ecosystems, balancing **innovation, backward compatibility, and operational stability**.
- Successfully deployed Pilot project at **University of Michigan Health**.

Barco CTRL (Enterprise Control Room & Visualization Platform)

- Lead Product Engineer for a **mission-critical control room platform** supporting complex visualization and orchestration environments.
- Contributed to **server-side and platform architecture**, ensuring scalability, performance, and high availability.
- Led AI initiatives for **intelligent monitoring, automation, analytics, and system optimization** in distributed, multi-component environments.
- Designed AI capabilities aligned with **real-world deployment constraints**, including hardware dependencies, latency sensitivity, and fault tolerance.

Delivery & Leadership Impact

- Improved release stability and predictability through **structured validation, phased rollouts, and governance practices**, resulting in fewer post-release issues.
- Enabled predictable sprint outcomes and reduced delivery friction through **effective Scrum facilitation and cross-team coordination**.

UI Architect

Test Yantra | Mar 2022 – Jan 2023

- Led architecture and delivery of a **SaaS-based no-code test automation platform** supporting heterogeneous devices and technologies.
- Acted as solution architect and delivery owner for client-facing systems, ensuring scalability, performance, and consistent user experience.
- Defined architectural and quality standards that **reduced regression issues and improved release confidence** across enterprise deployments.
- Streamlined delivery processes, contributing to **faster release cycles and improved delivery predictability**.

Sr. Associate – Experience Technology 2

Publicis Sapient Pvt. Ltd. | Aug 2018 – Oct 2021

Client: UPS | Digital Transformation Initiative

- Supported a **large-scale digital transformation program** modernizing **30+ client-facing applications** for a global logistics enterprise.
- Contributed to architecture alignment and phased modernization, reducing upgrade and deployment risk across distributed systems.
- Collaborated with multi-vendor teams to manage dependencies, release governance, and enterprise compliance requirements.

Client: The Children's Place (Global Retail)

- Led frontend modernization initiatives across **web and mobile commerce platforms**.
- Delivered and stabilized multiple production releases for a React-based enterprise application.
- Led legacy deployment initiatives, **minimizing operational risk during platform transitions** aligned with business-critical retail cycles.

Team Lead / Solution Architect

Damco Solutions Pvt. Ltd. | 2017 – 2018

Client: Booker | Project: MenuManager

- Led solution design and delivery of an **enterprise configuration management platform** embedded within a legacy .NET ecosystem.
- Architected a modern SPA integrated with legacy backend systems, balancing innovation with platform constraints.
- Introduced agile and test-driven delivery practices, **improving code quality and release predictability**.

Client: Aapryl (FinTech)

- Delivered a **financial portfolio analytics platform** enabling comparison against industry benchmarks.
- Designed frontend architecture for **data-intensive, visualization-driven decision systems**.
- Ensured alignment with data accuracy, security, and trust requirements typical of financial platforms.

Senior Software Engineer

NIIT Pvt. Ltd. | 2016 – 2017

- Spearheaded frontend architecture for **enterprise dashboards and analytics platforms**.
- Designed reusable UI components to support **scalable insight delivery and reporting**.
- Collaborated with backend and business teams to align **data pipelines with user-facing insights**.

Associate Software Engineer

Misys India Software Ltd. | 2013 – 2015

- Contributed to development of **core banking platforms** used by enterprise financial institutions.
- Worked on full-stack components supporting transaction processing and business logic abstraction.
- Supported automation initiatives that **improved reliability in mission-critical, regulated systems**.

Software Consultant

PMR Pvt. Ltd. | 2012 – 2013

- Developed a **machine-assisted data entry solution** that improved throughput and reduced manual errors using early machine learning and rule-based automation techniques.

EDUCATION

Master of Technology – Artificial Intelligence & Machine Learning

Natural Language Processing Specialization

BITS Pilani | 2023 – 2025

Bachelor of Technology – Computer Science

Manav Rachna International University | 2009 – 2013

SELECTED AWARDS & RECOGNITION

- Gold Medal - Intel India Embedded Challenge
- Best Project Award - Faridabad Industrial Association
- Spot Award - Misys India Software Ltd.
- Best Team Award - NIIT Pvt. Ltd.
- Champion Award – Barco Electronics Pvt. Ltd.
