PROFESSIONAL SUMMARY

- 3+ Years of experience in Web-based & Cloud Native Applications Development using Golang, React & Java
- Open Source enthusiast and maintainer of projects under TektonCD and jenkinsci/tekton-client-plugin
- Experienced in writing code for CLI tools, APIs, UI, shell scripts and Tekton Tasks and Pipelines
- Quick learner in adapting new skills, effective communication and time management
- Proven areas: Business Logic Implementation, Good & Flexible Team player

TECHNICAL SUMMARY

- | | | |
|----------------------|---|--|
| • Languages | : | Golang, Java, C, C++, JavaScript, TypeScript |
| • Scripting | : | Bash |
| • Databases | : | MySQL, PostgreSQL, MongoDB, Redis |
| • CI/CD | : | Tekton Pipelines, Github Actions |
| • Frameworks/Library | : | Operator Framework, Android, NodeJS, React, Maven, Spring-Boot |
| • Cloud/Cloud-Native | : | Google Cloud, AWS, Containers, Kubernetes, OpenShift |

EXPERIENCE

Razorpay, Bangalore - SDE 1

MAR 2022 - PRESENT

Technology Stack: Golang, Spring-Boot, SQL, Zookeeper, Redis, Kubernetes, AWS

- Wallet as a Service
 - Developed white-label closed wallet solution for merchants who need non-PPI wallets
 - Building transaction reports so that same can be shared with compliance team
 - Developed APIs for Shopify integration
 - Used reverse proxy to redirect traffic coming to a specific endpoint to a new deployment
- Card Issuer Tokenization
 - Setting up TCP connection with the Bank's Switch for Authorization and ACS for Authentication
 - Building modules which can generate ISO 8583 messages for authorization of transactions
 - Built a module which can be used to generate the settlement file which can be reconciled by bank systems
 - Integration with Visa network for Token Lifecycle & AWS KMS for its Encryption as a Service
 - Overseeing the deployment of a complete product on a bank's infrastructure
 - Mentoring new team in delivering new features

Red Hat, Bangalore - Software Engineer

OCT 2020 - FEB 2022

Technology Stack: Go, Docker, Kubernetes, OpenShift, React, Tekton Pipelines

- Adding support for serving catalog from private git instances specially for enterprise users
- Integrated Tekton Hub with Tekton Operator
- SysAdmin of Github Enterprise which is hosted on Red Hat's intranet
- Added UI patches to [tektoncd/hub](#) which is a web based platform to showcase Tekton Tasks present in [tektoncd/catalog](#)

- Improved the testing infrastructure of Tekton Catalog by modifying the shell scripts and added new checks in the repository
- Added new features in Tekton Hub CLI which can interact with Tekton Hub APIs
- Improved the user management in Tekton Hub by modifying the current set of APIs in order to make it compatible with the new OAuth server
- Added Github Enterprise support in Tekton Hub
- Added features in tektoncd/cli such as displaying workspaces in describe command of PipelineRun/Pipeline/TaskRun/Task/ClusterTask
- Created the container image for must-gather which can gather all the logs of OpenShift Pipelines which can help customers gather their logs before opening a support case

Red Hat, Bangalore - Intern

JAN 2020 - SEPT 2020

Technology Stack: Go, Docker, Kubernetes, OpenShift, React, Tekton Pipelines

- Learned Go, Kubernetes and OpenShift
- Explored various CI/CD ecosystems, their widely used plugins and after selecting the top ones, we contributed the same to Tekton Catalog
- Started contributing to Tekton Hub, the marketplace for Tekton Catalog. Contributed various UI patches
- Bug fixes in Tekton CLI and Tekton Pipeline

PROJECTS

Open Source Contributions

Technology Stack: Golang, Java

- Maintainer of Tekton Client Plugin for Jenkins in order to provide interoperability
- Maintainer of Tekton Catalog, Tekton Hub and Tekton CLI
- Contributing to the Tekton Pipeline and various enhancement proposals. Also facilitating the WG calls
- Contributing to Tekton Operator, a Kubernetes based operator which manages the lifecycle of Tekton Components
- Contributed to various other projects of Shipwright-IO, OpenShift, Ubuntu and Tekton VSCode extension
- Among top contributors in the community. Link to the developer statistics is [here](#)

CERTIFICATIONS

- Certified Kubernetes Application Developer from Linux Foundation
- Certified Kubernetes Administrator from Linux Foundation
- Architecting with Google Compute Engine Specialization from Coursera
- IELTS from IDP

EDUCATION

KIET, Ghaziabad (Affiliated to A.K.T.U.) - Bachelor of Technology

(Information Technology)

AUG 2016 - SEPT 2020

- Participated in various activities such as Hackathons, inter-college technical fests & member of college IT team
