 [linkedin.com/in/kumar-vinay](https://www.linkedin.com/in/kumar-vinay)

Summary

Results-driven engineering leader with over 13+ years of experience in leading and developing high-performing teams to deliver large-scale distributed applications. Proven track record of driving technical excellence, innovation, and operational efficiency in a SaaS environment. Adept at building and nurturing cross-functional relationships with design, product management, and architecture teams. Skilled in defining strategic roadmaps, end to end delivery of product including Mobile apps, implementing agile methodologies, and achieving continuous improvement. Well-versed in cloud-native, event-driven, microservice architecture, Security concepts, data platforms and enabling AI/ML use-cases for the real world on scale.

Experience

Engineering Manager

Hiver

Dec 2023 - Present (11 months)

- Developed a Gmail-integrated SaaS product with features like Auto-Assignment, AI Summarizer, and automated scheduling, **driving a \$90K ARR value**.
- Built an observability dashboard using DD to help business and engineering leaders identify inefficiencies, **yielding ~\$8K/month in cost** and performance gains despite additional costs.
- Enabled on-call and RCA (Root Cause Analysis) cadence for the team, which decreased number of issues MoM and reduced L1 support issues by 40%.
- Identified and **mitigated Noisy Neighbour problem in sync engine** which is responsible to sync billions of emails daily, resulting to **decrease 95%tile of email sync from 20 minutes to 2 minutes**.
- Migrated Sync engine workers to Kubernetes and enabled custom metrics for HPA which saved cost (4k \$ / month) and increased availability of system.
- Achieved **Zero downtime at the time of deployment in API server** using Kubernetes configurations.

Usages of AI: AI Summariser with LLM, AutoAssignment based on NER.

Key Technologies: Python, Java, Typescript, React, ReactNative (Android & IOS app), Kafka AWS,

GCP, Kubernetes, CI/CD, DataDog, Graphana, SageMaker, Selenium .

Engineering Manager

OLX

Oct 2020 - Nov 2023 (3 years)

- Led and supported account split which involved split of Git Repos, Artifacts, AWS Cloud and 3rd party to support OLX business sell off.
- Led a team of 15+ backend & frontend engineers, designing and delivering low-code process

automation/workflow platform improved operational efficiency of **Car Buy Journey by 70% and reducing dependency on 3rd party saving bill of ~\$1M.**

- Build templization of workflows that reduced time to launch a new market from 8 weeks to 3 weeks.
- Oversaw end-to-end development lifecycle, ensuring adherence to best practices and coding standards.
- Led the digital transformation Finance Ops by integrating SAP with **Order Management reducing manual work by 82% using SAGA architecture pattern.**
- Transformed Inspection App, **reducing inspection time by ~30%** through offline support and integration with **Pricing Model based on ML to predict the Car Price & 360 view rendering.**
- Launched Document Management Application and integrated OCR to increase efficiency of ground operations.

Usages of AI: Automated Document verification - CNN, Price Prediction - DeepLearning.

Key Technologies: Java, NodeJs, React, ReactNative, AWS, Kafka, Kubernetes, Low-Code platform, Databases, CI/CD, Selenium.

Lead Software Engineer

OLX

Feb 2018 - Sep 2020 (2 years 7 months)

- Launched Seller side of platform using **multi-tenant architecture** to new markets MX/CL to enable **business expansion in LATAM market.**
- Integrated Car detection model and price prediction model **to decrease time to post a Car Ad from 30 minutes to 10 minutes** by coordination with data scientists.
- Improved system availability from 96.64% to 99.8% through proactive measures and successful migration to AWS and Kubernetes on a scale of ~ **100MAU.**
- Launched VAT tool to moderate Video Ad Posting.
- Enabled CI/CD to increase deployment frequencies.
- Built Serverless Event-Bus using SNS, SQS and API Gateway to support millions of message per day.
- Adopted Kafka to enable event driven architecture and high scale event propagation.
- Led a team of **8 people from the backend, PWA, Android & IOS to build consumer sell-side product with more than 50 Million MAU**
- Developed an easy-to-integrate library and middleware for SSO (Okta, OneLogin) integration using SAML, OpenID with in-house tools, significantly reducing the manual effort of onboarding and offboarding users across various tools. This solution minimized development time and streamlined the addition of authentication and authorization across all in-house applications.
- Developed a library to enable a structured and correlated logging system, streamlining logging across multiple applications and simplifying issue debugging in a distributed environment on ELK stack.

Usages of AI: Car detection model - CNN and Price prediction - Linear regression.

Key Technologies: Java, Python, NodeJs, React, IOS, Android, AWS, GCP
Kafka, Kubernetes, Databases, CI/CD, Selenium, Appium

Senior Software Engineer

OLX

Feb 2017 - Feb 2018 (1 year 1 month)

- Contributed to design and ideation of splitting monolithic application to microservice-based distributed application to allow a **scale to support 100M MAU.**
- Built microservices and supported the migration.

- Developed a Job Portal with help of 2 developers in 1 months, **generating \$4.8M in annual revenue** using technologies Elastic Search, MySQL, AWS, React.
- Developed reusable, configurable dynamic forms in collaboration with PWA, iOS, and Android backend developers within 1.5 month. These forms integrate seamlessly with CTAs and deep links to capture various data types, supporting lead generation and marketing campaigns and **contributing to \$24M in revenue**.

Key Technologies: Java, PHP, Python, React, IOS, Android, AWS, Kafka, CI/CD

Software Engineer

OLX

Sep 2015 - Feb 2017 (1 year 6 months)

- Implemented multiple security solutions in a legacy application to address XSS, CSRF, and rate limiting, reCAPTCHA, SQL Injections & broken access controls. Successfully **managed a hacker threat involving potential exposure of user information**.
- Built personalization of home screen by configurable widgetization from backend which increasing **user retention from 30 seconds to 3 minutes**.

Key Technologies: PHP, JavaScript, jQuery

Lead Engineer

Infoedge India Ltd.,

Oct 2013 - Sep 2015 (2 years)

- Designed and developed highly scalable web applications using the LAMP stack, Memcache, Solr, and jQuery.
- Created reusable and easily integrated components in PHP and jQuery, such as Tiny Carousel, Tiny Scroller, Photo-Video player, Accordion, Paginator, and Animators.
- Revamped CMS panel to improve functionality.
- Contributed to the development of Shiksha.com, an educational website.

Key Technologies: PHP, JavaScript, jQuery, Java, Databases

System Engineer

Tata Consultancy Services

Jul 2011 - Oct 2013 (2 years 4 months)

- Developed web applications for TCS Bancs, a banking product focused on trading clients.
- Utilized QPP as the programming language, which could be translated to JAVA or CPP.
- Used the Struts framework and worked with J2EE, JMS, and MySQL & Oracle Reports for specific tasks.
- Recognized as a top performer in the team.
- Developed Swift codes to facilitate banking message exchange.

Key Technologies: Java, J2EE, JMS, Databases

Education

J.C. Bose University of Science and Technology, YMCA

B.Tech

2007 - 2011

Computer Science

Fundamentals Data
Structures and Algorithms
Object-Oriented Programming, Database Management Systems, Operating Systems

Licenses & Certifications

 **The Art of Leadership (getAbstract Summary)** - LinkedIn

 **Prioritizing Effectively as a Leader** - LinkedIn

 **Amazon Web Services Solutions Architect Associate** - Amazon Web Services (AWS)

Issued Feb 2019 - Expires Feb 2022

Skills

Backend Development - Java, PHP, NodeJs • Distributed Systems • Scalability and Performance Optimization • Cloud Platforms - AWS, GCP • Database Technologies • API Design and Development • Agile Methodologies • Leadership and Team Management • Cross-functional Collaborations • Problem-solving and Decision-making

Honors & Awards

 **Build on each other** - OLX
Dec 2019

 **Be Empowered** - OLX
Feb 2018

 **Nasper Innovation Award 2016** - Naspers Limited

Sep 2016

- Part of the team won first prize at Nasper Innovation Award held at New York for building configurable widgetization at the OLX App home page with proven results-focused to increase user retention metrics
