## SUMMARY

---

With over 7.5 years of experience in software engineering, I bring expertise in building large-scale systems and data pipelines that power key features for millions of users in Microsoft products like Outlook and SMS Organizer. Additionally, I bring entrepreneurial vision, grit and customer delight mindset, honed from my experience in scaling a D2C fashion brand from scratch to 1.2 crore.

## WORK EXPERIENCE

---

**Unprofessional, Hyderabad — Co-founder & CTO**

**2020-2024**

*D2C e-commerce clothing startup using software and AI to innovate in fashion.*

- **LLM powered WhatsApp Bot:** Developed an Industry leading WhatsApp bot using large language models to automate customer engagement and support, reducing acquisition costs by 31% and customer support bandwidth by 80%. This bot also decreased Return to Origin by 22% and built a potential customer base of 1M+
- **Real-time Inventory Forecasting:** Led the development of an inventory management and forecasting system that integrates order history, clickstreams, and social media metrics. Achieved a 19% revenue increase and a 34% reduction in dead stock
- **AI-driven Design Generation:** Scraped social media and search data to identify trending designs, feeding these into generative AI to create high-performing, fresh designs. Generated 36% of top sellers and achieved 10M+ views on Instagram, securing a #1 Google rank for our category.
- **Leadership:** Directed a cross-functional team of 4 by crafting product roadmap, handling code reviews, low level design, refactoring, system design and architecture, cloud deployment.
- **Tech Stack:** Python, langchain, MLflow, LLMs, Spark, AWS, FastAPI, Java, Spring Boot, Redis, Kafka, S3, SQL, Flink, Docker, Kubernetes, CI/CD

**Microsoft, Hyderabad — Software Engineer 2**

**2016-2019**

*Built scalable data pipelines and processing systems for Microsoft Outlook & SMS organizer app.*

- Built robust data pipelines and systems that processed over 8 million emails daily, ensuring privacy and powering machine learning email classifiers for Outlook.
- Focus areas included data ingestion pipelines, email clustering, anonymization, sampling, ML classifier training, deployment, and performance monitoring.
- Designed and developed an advanced data annotation tool, facilitating the creation of labeled datasets for training classifier and extractor models, used across multiple teams.
- Played a key role in the development of the SMS Organizer app, contributing to its success with over 1 million downloads.
- **Tech Stack:** C, .NET, Azure (Redis, Kafka, Cosmos DB, Spark), Python, TensorFlow, Docker

- Developed a web admin dashboard for monitoring key events for the Intuit TurboTax product, enhancing real-time monitoring capabilities.

## EDUCATION

---

**Indian Institute of Technology Madras (IITM)**

**2012 -2016**

*B.Tech in Computer Science & Engineering*

Courses: Datastructures and algorithms, Distributed Systems, DBMS, OOP, Computer Networking, Machine learning, Computer Vision etc

## SKILLS

---

- **Languages:** Python, Java, C#, SQL
- **Backend:** Spring boot, Node.js, .NET, REST API, GraphQL, Microservices, Firebase
- **Cloud:** Amazon web services (AWS), EC2, MySQL, MongoDB, S3, Redis, DynamoDB, Kafka, Elasticsearch, Flink, Spark, Docker, Kubernetes, CI CD
- **Machine Learning:** Scikit-learn, Keras, NLP, TensorFlow, Pandas, Mlflow
- **Frontend:** HTML, CSS, JavaScript, React js
- **Additional Skills:** Technical Leadership, Strategic Planning, Customer-centric Innovation

## ACHIEVEMENTS

---

- Achieved an All India rank of 238 in IIT JEE 2012 (open category)
- Secured All India rank 1 in SRM entrance exam.
- Recipient of the Merit cum Means scholarship at IIT Madras for academic excellence.
- Winner of the India Biz Hackathon at Microsoft, for innovative problem-solving for small businesses.
- Achieved Chess ELO rank of 1500 (Amongst top 2.5% players globally)
