

Name **VIGNESH J**

Resides Chennai, India

Phone +91 9611244274

Email vigneshjeyachandrann@gmail.com

Date of Birth 20-01-1989

Nationality Indian

Gender Male

LinkedIn URL <https://www.linkedin.com/in/vignesh-jeeyachandran/>

PROFILE SYNOPSIS

- Technically competent and experienced IT professional with overall 14 years of experience in analysis, design, development, customizations and implementation of and Data engineering solution in Azure & GCP cloud ecosystems
- Strong experience in Big Data ecosystems like HDFS, Hive, Spark
- Strong experience in developing applications in Azure using the components like Azure Storage Accounts, Azure Data Factory, Azure Databricks, Azure SQL, Unity Catalog, Azure Key Vaults, Delta Lake tables
- Good experience in developing applications in GCP environment
- Strong experience in Java and Scala

SKILLS SET

- Azure Databricks
- Azure Data factory
- Unity Catalog
- Delta Lake tables
- GCP Big query

GLOBAL EXPOSURE

- Efficiently interacted and worked with onshore teams and clients while handling projects
- Able to work with cross-functional team environments from diverse backgrounds & geographies

CAREER TIMELINE

Organization	Designation	Duration
Walmart India	Data Engineer	Aug 2020 – Apr 2025
Mu Sigma	Apprentice Leader / Technical Lead	Feb 2019 – Aug 2020
TAVANT Technologies	Technical Lead	Aug 2018 – Feb 2019
Robert Bosch	Associate Project Manager/Senior Software Engineer	Sep 2014 – Aug 2018
Wipro Technologies	Software Engineer	Apr 2011 – Aug 2014

KEY CONTRIBUTIONS

- Key in developing optimized spark applications and building pipeline in Microsoft Azure ecosystem and GCP as well
- Dexterously handled Big Data application development activities throughout the US leading retailer with technologies including Apache Spark, Hive, Java & Scala
- Led the Software Development Lifecycle right from requirement analysis, documentation, coding and testing to maintenance of proposed applications
- Strategized resource requirements & delivery models; monitored Spark Code performance tuning & Hive table creation activities
- Drove large-scale architecture, design efforts, development & deployment of high-performance scalable application
- Fine-tuned Apache Spark performance code for steering critical improvements & clean code
- Ensured all activities & deliverables associated with the project are coordinated & completed on time, in adherence to the Software Development Framework and Quality Assurance processes Successfully completed delayed projects essential for operational efficiency by identifying and solving complex technical problems using interdisciplinary teams; restricted the schedule delay
- Managed the Development Lifecycle using the Agile Scrum methodology
- Slashed development and schedule effort by 30% through measures such as knowledge transfer sessions across team members.
- Spearheaded 1 project as Scrum Master with teams of 4 to 6 members; maintained JIRA & status report
- Active involvement in a POC using Microsoft Azure as a part of migration project.
- Conducted various training sessions on basic of Azure resources & cloud computing
- Led the completion of a POC in ELK stack to demonstrate Kibana usage for data visualization of various metrics thereby enabling successful business migration to Hadoop integrated solution
- Pivotal as Scrum Master & led activities including daily stand-ups, grooming sessions, sprint planning meetings and managed estimated requirement based on sprint duration
- Contributed to all phases of the development lifecycle and ensured delivery of high-performance applications through effective software analysis, programming, testing, and debugging

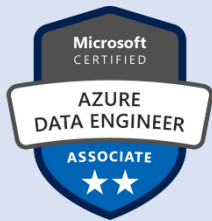

TECHNICAL COMPETENCIES

Big Data Application Development	
Programming	Apache Spark, Core Java, Scala
Cloud Ecosystem	Microsoft Azure
Others	Jenkins, GitHub, Azure Devops

EDUCATION

- Bachelors of Electronics Engineering (ECE) from National Engineering College, Kovilpatti

CERTIFICATION -

- MS Certified Azure data Engineer DP – 203

PROJECT HANDLED

Walmart:

Title:	Assortment - Merchandising
Role:	Data Engineer
Tools Used:	Azure components like Databricks, ADF, Unity Catalog, Delta Lake tables
Description:	As a part of implementing Assortment initiative in Merchandising area, where multiple modules were developed using Azure components to serve the business requirements

Mu Sigma:

Title:	GFA – CI Development
Role:	Tech Lead
Tools Used:	Azure components like Databricks, Data factory & Data lake & GCP Big query
Description:	As a part of implementing “Cost to Serve” (CTS) initiative in supply chain area, data would be ingested into Azure data lake followed by curation & transformation. Azure data bricks is leveraged to developed various business logic to derive KPI information which will be later consumed by Data scientists for further analysis.

Robert Bosch:

Title:	GFA – CI Development
Role:	Associate Project Manager
Tools Used:	Apache Spark, Core Java 8, Hive, Sqoop, Oozie and Kibana
Description:	DGS builds which involves various tools and functionality would be tested continuously in Jenkins which led to 5 GB of MySQL data and logs. Spark application is developed to perform in depth analysis of “Build status analysis” based on tools used in respective DGS build chain, tool versions along with PVER & PFAM details by consuming log files. Oozie workflow is created to move data from MySQL to HDFS for ETL processing using hive warehouse

LANGUAGE SKILLS

- Proficient in English
