

TECHNICAL SKILLS			
DevOps Tools:	Git, GitHub, Jenkins, Docker, Kubernetes, Ansible, Terraform		
Cloud Platforms:	AWS (EC2, S3, IAM, VPC)		
CI/CD:	Jenkins		
Version Control:	Git, GitHub		
Scripting & Automation:	Bash, Python, YAML		
Containerization:	Docker, Kubernetes		
Monitoring:	Prometheus, Grafana		
Infrastructure as Code (IAC):	Terraform		
Configuration:	Ansible		
OS:	Linux (Ubuntu, CentOS), Windows		
WORK EXPERIENCE			
Tata Consultancy Services - Chennai	DevOps Engineer	October 2021 - present	
DevOps Engineer - Feb 2023 – Present - Proficient in automating CI/CD pipelines using Jenkins and integrating build automation tools like Maven to create deployable artifacts from source code. - Experienced with AWS services including EC2, ELB, S3, VPC, NACL, CloudFormation, Route 53, IAM, API Gateway, CloudTrail, CloudWatch, SQS, and Lambda, with a strong foundation in hybrid environments and cost management best practices. - Skilled in deploying and managing AWS infrastructure using Terraform and CloudFormation for efficient resource provisioning. - Strong background in containerization using Docker, standardizing environments across development, testing, and production. - Hands-on experience in Linux administration (Ubuntu, CentOS) for system updates, monitoring, and user management. - Automated key system maintenance tasks with Python and Linux, such as log rotation, resource monitoring, Jenkins home directory backup, and Docker host management. Assistant System Engineer - October 2021 – Feb 2023 - Orchestrated data processing, job creation, and scheduling in mainframe environments, maximizing system performance and ensuring data integrity. - Executed bug fixes and impact analysis, and managed application migrations, collaborating with cross-functional teams to deliver successful projects.			
PROJECTS			
GUVI Geek Technologies - Chennai			
Project – Deploy React App using Jenkins, Docker, AWS EC2 and Prometheus - Leveraged Git for version control and Jenkins to automate the build, test, and deployment of a React application - Containerized the app using Docker and deployed it on AWS EC2 for scalable, consistent hosting – automated CI/CD pipeline - Employed Prometheus to track real-time metrics, ensuring high availability & optimized performance in production environment Project – Deploy Java Maven Project using Jenkins, Docker, Kubernetes and Transform - Automated the build and deployment of a Java Maven project using Jenkins and Docker - Deployed the containerized application to Kubernetes successfully - Managed infrastructure provisioning with Terraform for scalable and efficient deployments			
CERTIFICATIONS AND TRAININGS			
Completed DevOps Program from GUVI Geek Technologies (Remote)		Apr 2024 – Jul 2024	
Completed DevOps Certification from Edureka		Dec 2023 – Jan 2024	
Undergoing Azure Administrator Certification		May 2023 – present	
AWARDS AND ACHIEVEMENTS			
- On the Spot Award – TCS Technologies – August 2024 - Star of the Month Award – TCS Technologies – February 2024 - Xcelerate Warrior certificate – April-May 2023 - Star Team Award – March 2023			
EDUCATION			
B.E. (ECE)	SSN College of Engineering	GPA – 7.05	2016 – 2020
