PROJECT DETAILS

LTIMINDTREE

PRODUCT DETAILS

Travelers

As a part of this migration project I used to work on PostgreSQL DB to fix the issues in PostgreSQL code which is converted from Oracle DB through QWS SCT tools. Also I've worked on test cases for Oracle and PostgreSQL DB to test the procedures in both the DB's to match the results with Oracle.

Time and Attendance System (TAS)

Time and attendance system was a Human Capital Management system which was used to schedule, plan and calculate the attendance and salary for 6 different plants of Kellogg USA. It was a crucial application for Kellogg since staff allocation and planning was done based on the data processed by this application. Managing schedules, hours worked and time off is critical for payroll accuracy and compliance. The right HCM process can make it easier to track and manage on-the-job hours, leave applications and security requirements, and automate your payroll. Every week salary process used to happen and data was fed to **Kronos** Dayforce system.

Kellogg Plant Loss Accounting System (KPLAS)

Kellogg Plant Loss accounting System (KPLAS) used to provide the real-time update of plant machine data like feed, uptime, downtime, issue reporting, issue tracking. Supervisors used to refer the data for different statistics. It feeds data to SAP for reporting.

3i InfoTech Ltd

The PREMIA insurance management solutions suite is designed to proficiently perform all the functions of an insurance company such as underwriting / policy administration, claims management, reinsurance and Finance accounting. The offerings in our insurance software solutions suite are used by some of the most recognized names in the global insurance industry.
