SUMMARY

Experienced professional with over 4 years of expertise in Python development and Data Science. Skilled in building scalable solutions using Python libraries and frameworks. Strong background in statistical analysis, machine learning, and data visualization.

EXPERIENCE

TheMathCompany - Associate

Bengaluru, KA

06/2022 - Present

- Constructed a web-based booking application utilizing a Time series forecasting model to predict impressions accurately, resulting in achieving the desired ROAS and enhancing the user experience through effective ad reservation.
- Incorporated SMTP integration to facilitate ongoing notifications and harnessed Python's multiprocessing capabilities for parallel execution, significantly enhancing application performance.
- Created engaging dashboards, delivering valuable data insights through the utilization of the Plotly library in Python.
- Engineered and deployed scalable software solutions, including the development and implementation of APIs in JSON format.
- Performed extensive data collection, cleansing, exploratory analysis, and visualization tasks utilizing Python.
- Experienced in working in an Agile development environment.

Prodapt Solutions - Software Engineer

Chennai, TN

08/2019 - 05/2022

- Formulated an effective model-building strategy in Natural Language Processing, encompassing intent classification, entity recognition, text summarization, and topic modeling for Engagement score prediction using Rasa, SpaCy, and NLTK libraries.
- Researched and implemented a Time series forecasting model for Anomaly Detection using FB Prophet.
- Developed an NLP model that performs keyword extraction and categorizes the files with technical keywords.
- Migrated an in-house website to GCP using Google Compute Engine, Google Cloud Storage (GCS), and Cloud SQL integration.
- Orchestrated a successful 3X optimization of the company website's page speed, surpassing Core Web Vitals benchmarks, and played a pivotal role in the website's redesign while bolstering SEO rankings.
- Engaged in a Proof of Concept (POC) centered on Acumos AI, with tasks involving sample ML model onboarding, database connectivity, and log analysis using the ELK stack for enhanced insights.

TECHNICAL SKILLS

Programming Languages: Python, C, PHP

Database: PostgreSQL, MySQL, MongoDB

Cloud Platforms: Azure (Blob storage, Azure Functions, App services, Key Vaults), GCP (GCS, Compute Engine, CloudSQL, Cloud functions)

API Frameworks: FastAPI, Flask

Library/Tools: Scikit-Learn, NLTK, SpaCy, Rasa, Plotly, Seaborn, Matplotlib, Pandas, NumPy, SciPy, Textblob, Kibana, Botpress, FB Prophet

Frontend stack: HTML, CSS, JS

CMS: Wordpress

Containerization: Docker, Kubernetes

OS/Server: Windows, Linux, Apache HTTP Server

VCS: GIT

EDUCATION

Sri Sairam Engineering College

Chennai, TN

08/2015 - 05/2019

Bachelor of Technology:

Information Technology

GPA: 7.94

Member, IEEE Computer Society,

Member, Graphics Design team.

CERTIFICATIONS

- IBM Data Science Specialization (Coursera - IBM)
- Natural Language Processing Specialization (Coursera - DeepLearning.ai)
- Python Full Stack (iPrimed Education Solutions)
