SUMMARY

Experienced Senior Backend Java Developer with over 8 years of demonstrated expertise in architecting, designing, and implementing robust, scalable, and high-performance solutions. Adept at crafting efficient microservices using the Spring ecosystem, with a strong track record in both the Banking & Healthcare domains. Passionate about large-scale distributed systems.

EXPERIENCE

Software Engineer II

Oracle Cerner (Cerner Healthcare)

June 2016 - January 2023, Bangalore

- Led the design and development of a Healthcare Analytics & Reporting microservice for a large healthcare management platform.
- Designed & integrated a Kafka event-sourcing mechanism & Kafka Streams for real-time processing of Healthcare Analytics trends.
- Employed Spring Cloud Security to manage OAuth2 configurations across microservices.
- Utilized Spring Cloud's service discovery and load balancing features to dynamically manage microservices communication.
- Leveraged Elasticsearch's full-text search capabilities to quickly retrieve patient records, diagnoses, treatments, and clinical notes.
- Employed distributed tracing mechanisms such as Spring Cloud Sleuth to visualize end-to-end request flows across microservices.

Software Engineer

Oracle Cerner (Cerner Healthcare)

July 2016 - December 2018, Bangalore

- Created RESTful APIs for seamless integration with other microservices and frontend applications.
- Implemented multithreading to efficiently process large volumes of patient data & generate real-time reports.
- Employed TDD and BDD methodologies to write unit tests and behavior specifications, resulting in improved code quality.
- Collaborated with DevOps teams to containerize the microservices using Docker and manage orchestration with Kubernetes.
- Accelerated development cycle by leveraging Automated CI/CD pipelines with Jenkins and Git.
- Improved scalability and performance by 10%, resulting in a 30% decrease in response times.

Consultant (Product Engineer)

Intellect Design Arena (Polaris Financial Technology Limited)

June 2014 - May 2016, Chennai

- Developed & maintained critical backend components for core banking applications.
- Created 15+ scalable and high-performance APIs, fostering seamless and secure data exchange across diverse banking systems.
- Successfully implemented over 100 enhancements for the Cash Management System, resulting in a 100% zero-defect sign-off rate.
- Implemented 5 batch processing solutions, automating essential tasks, leading to a 50% reduction in processing time.

Software Engineer - Intern

Intellect Design Arena (Polaris Financial Technology Limited)

January 2014 - June 2014, Chennai

- Led the development of a project tracking application, for tracking tasks, milestones, and progress across multiple projects.
- Utilized Java to build the backend logic, implementing robust APIs for data manipulation, authentication, & project task management.
- Employed JavaScript and front-end libraries to develop an intuitive and responsive user interface.

EDUCATION

Master of Computer Applications

Manipal Institute of Technology • Manipal (India) • 2014

Bachelor of Computer Applications

Mangalore University • Manipal (India) • 2010

SKILLS

Languages: Java, JavaScript, Python, SQL & Golang

Technologies: Spring, Spring Boot, Node JS, Elasticsearch, Kafka MySQL, PL/SQL, AWS, Git & Prometheus, Linux, Bash

Others: Data structures and algorithms, Object - Oriented Design, System Design & DevOps
