Profile Summary

Senior iOS Developer with **6 years** of experience building scalable applications using **Swift**, **Objective-C**, and **SwiftUI**. Skilled in modular **Software Development Kit (SDK)** development, **Model-View-ViewModel (MVVM)** and **Model-View-Controller (MVC)** architecture, and performance optimization. Delivered features across **AI**, **e-commerce**, **food technology**, and **Customer Relationship Management (CRM)** domains through cross-functional collaboration.

Core Competencies

- **Languages:** Swift, Objective-C, SwiftUI
- **Frameworks & Tools:** Xcode, Cocoa Touch, Realm, CoreData, Firebase, Crashlytics, PostHog, Amplitude, AWS SDK
- **Design Patterns:** MVVM, MVC, Singleton, Delegate, VIPER
- **Architecture:** White-label Architecture, Modular SDKs (xcFramework), REST APIs, SOAP APIs
- **App Integration:** Deep Linking, App Thinning, Analytics, Third-party SDKs, Push Notification
- **Performance Optimization:** Code Reviews, Refactoring, Memory Management, Debugging, Unit Testing
- **Version Control:** Git, GitHub, Bitbucket, CocoaPods, Swift Package Manager (SPM)

Professional Experience

Senior iOS Developer | Spyne.ai | Gurugram, India

April 2023 – Present

- Led iOS development for AI-driven automotive app, increasing release velocity by 40% via modular architecture.
- Built reusable xcFrameworks in Swift, powering 10+ white-label apps with 90% code reuse.
- Boosted app performance by 30% using Instruments and on-device profiling.
- Developed automobile SDK used across 10k+ vehicle listings monthly.
- Shipped 15+ features in collaboration with design, product, and QA teams.
- Migrated UIKit screens to SwiftUI incrementally, improving code maintainability.
- Mentored 3 junior developers, reducing code issues by 60% through GitHub reviews.

iOS Developer | Vikgol (Client: Spyne.ai)

July 2022 – April 2023

- Created 10+ scalable white-label apps, reducing client setup time from 3 days to 1 hour.
- Extended 360° shoot support to new clients, enabling seamless integration across white-label apps.

iOS Developer | Cinntra Infotech Solution Pvt. Ltd | Noida, India

August 2021 – June 2022

- Built enterprise-grade iOS apps using MVVM and RESTful API integration.
- Delivered polished UIs with UIKit animations and Figma-based design implementation.
- Collaborated with cross-functional teams to release 10+ features under Agile methodology.

- Improved app stability by fixing crash-prone areas using Firebase Crashlytics and Instruments.

iOS Developer | Alobha Technologies Pvt. Ltd | Noida, India

August 2019 – July 2021

- Delivered 4+ apps across e-commerce and services with 4.5+ App Store ratings.
- Integrated third-party SDKs like Razorpay, Google Maps, and Firebase.

Projects

Spyne Automotive | Automotive Retail | AI Photography

App Store: Spyne Automotive

- Developed an AI-powered iOS application for studio-quality vehicle imaging.
- Integrated AWS-based image/video uploads with PostHog analytics, reducing failures by 95%.
- Implemented 360° spin generation and dent/damage detection, increasing client acquisition by 20%.
- Delivered as modular Swift-based xcFramework SDK reused across multiple clients.

Food SDK (Swiggy) | iOS SDK | FoodTech

TestFlight: Swiggy Food SDK

- Created a lightweight Swift SDK for restaurant partners to capture consistent food images.
- Implemented AI-based image enhancement: background removal, shadow correction, lighting.
- Delivered as modular xcFramework for Swiggy partner apps.

Bridge CRM | B2B SaaS | Sales Enablement

App Store: Bridge CRM

- Built CRM app for managing leads, tasks, and customer interactions.
- Integrated secure, real-time REST APIs and custom UI for pipeline management.

Mesee | Service Booking Platform | Dual iOS Apps

App Store: Customer / Partner

- Developed customer and partner apps for service booking, tracking, and scheduling.
- Integrated calendar, push notifications, and location-based services.

Achievements

- Built and integrated iOS SDKs (xcFrameworks) into React Native apps, enabling cross-platform scalability.
- Delivered a custom food catalog SDK for Swiggy, improving image quality and consistency across partner menus.

Education

B.Tech in Computer Science | Rayat Bahra University

2015 – 2019

- Graduated with First Division. Coursework: Data Structures, Mobile Computing, Software Engineering.
