PROFESSIONAL EXPERIENCE

Technical Lead

Dokonaly Cargo Management Services Pvt Ltd.

04/2022 – present
Chennai, India

- Architected and led the development of a comprehensive logistics product, Dokonaly, from the ground up. This all-in-one application streamlines operations by encompassing three user portals within a single platform.
- Championed the use of React as the primary frontend framework, implementing best practices for a seamless user experience.
- Enhanced application functionality and maintainability by leveraging key libraries such as Redux Toolkit, Tanstack Query, React Router v6, and React Hook Form.
- Established and enforced high code quality standards by code review and through the implementation of ESLint and Prettier configurations.
- Successfully spearheaded the development and deployment of the logistics product, which is currently in production use and has delivered measurable improvements to company operations.

Senior Software Engineer

TNQ Technologies

11/2018 – 04/2022
Chennai, India

- Developed and maintained the Edit Central online interface tools, facilitating efficient proofreading and submission processes within the E-publishing portal. Leveraged a tech stack of JavaScript, PHP, and MySQL.
- Optimized workflow by implementing features like real-time collaboration tools and version control functionalities.
- Improved communication and accessibility by integrating feedback mechanisms and user interface customization options.
- Contributed to performance enhancements by optimizing code structure and database queries.

Lead Software Engineer

Ticketgoose.com

01/2017 – 10/2018
Chennai, India

- Led the development of ticketgoose.com, an online bus ticketing platform designed for user-friendly booking experiences. Utilized React, Node.js, Express.js, and MySQL.
- Streamlined the booking process by integrating payment gateways like CCAvenue, Citrus, and TechProcess.
- Ensured real-time communication by implementing email and SMS notifications upon ticket booking.
- Expanded booking options by integrating with travel APIs such as KPN, Parveen, and VRL.
- Broadened business reach through B2B partnerships by sharing inventories with platforms like Travelyari and VIA

Senior Web Developer

V4U techsolution

09/2012 – 12/2016
Chennai, India

- Developed and maintained the E2C Techzone application, a customer relationship management (CRM) solution for small businesses. Utilized React, Node.js, and Express.js.
- Designed features to simplify customer data management and streamline sales processes.
- Implemented comprehensive search functionalities within the CRM platform.
- Enhanced data security by implementing user authentication and access control measures.
- Improved user experience by creating a visually appealing and intuitive interface.
