Mobile: +91-9080430499

Email ID: jayveeraa.noah@gmail.com

EXPERIENCE SUMMARY:

- Over 6 years of experience as an Oracle PLSQL Developer in **analysis, design, development, implementation, testing and support** of **Oracle** client-based server development and also in **Data Warehouse environments** using **oracle 10g/11g/19c, ETL(Informatica)**.
- Experience in Oracle advance PL/SQL Stored **Procedures, Functions, Packages** and **Triggers**.
- Having experience in **UNIX/LINUX**.
- Having Experience in **ETL (Informatica)**.
- Experience in **Banking and Healthcare**.
- Vast Experience in Oracle advance SQL Programming Using **Joins, Sub Queries, Analytical Functions, Tables, Constraint, Sequences, Indexes, Views and Synonyms**.
- Experience in creating/Modifying **Cron job** process in UNIX.

PROFESSIONAL EXPERIENCE:

- Worked as **Specialist Software Engineer** in **LTIMINDTREE, INDIA** from June 2022 to May 2023
- Worked as **Senior Software Engineer** in **YOHO TECHNOLOGIES, INDIA** from July 2017 to June 2022.
- Worked as a **Document Specialist in Engineering Consortium Consulting Engineers, Dubai, UAE** from Sep 2015 to May 2017

CERTIFICATIONS: ORACLE DB CERTIFIED ASSOCIATE

PROJECT EXPERIENCE SUMMARY:

PROJECT # 1:

Project Title	Transactor
Client	CITI BANK, NEW YORK, USA
Role	Specialist Software Engineer
Duration	Jun' 2022 to May 2023
Domain	Banking
Development Tools	SQL DEVELOPER, JIRA, INFORMATICA, SERVICE NOW, SVN, ECLIPSE IDE, BIT BUCKET, TECTIA, JENKINS, RPM, CA WORKLOAD AUTOMATION

Roles & Responsibilities:

- 'Transactor' is a data warehouse for financial, MIS and local regulatory reporting purposes, which focus on three main customer areas namely: Corporate Division, Consumer Division and Private Banking.
- Financial data from different sources are standardized, tagged and enriched to build the financial data warehouse.
- From the technical front, we are working as a backend team to build, develop and improvise the source codes by turning and re-writing it as per business standards.
- Extensively worked in developing ETL Program for supporting data extraction, Transformations and loading using Informatica power center.
- Designed and developed complex mappings to move from data from multiple sources into a common target area such as data mart and data warehouse using lookups and other transformations.
- We perform various cross validations by doing database Import, Batch process running and unit level testing.

PROJECT # 2:

Project Title	NEXINFRA(NEXIN)
Client	NEXus Pain Center of Columbus, USA
Role	Software Engineer
Duration	Sep' 2020 to May'2022
Domain	Healthcare
Environment	Oracle 11g, 10g, SQL*PLUS, SQL Developer, UNIX.

Roles & Responsibilities:

- Created new database objects like Sequences, Procedures, Functions, Packages, Triggers, Indexes and Views in Development and Production environment in PL/SQL and SQL*Plus.
- Performed Master data population by identifying the functional requirements through SQL/Loader.
- Working directly with the Product Owner to clarify details and further define the details of how the story should be implemented.
- Design, develop, and conduct unit test plans for ensuring application code is functioning correctly.

PROJECT # 3:

Project Title	HMS-Nexus
Client	Nexus Pain Center of Columbus
Role	Software Engineer
Duration	Sep' 2019 to Aug' 2020
Domain	Healthcare
Environment	Oracle 11g, SQL*PLUS, SQL Developer, UNIX, Informatica

Roles & Responsibilities:

- Responsible in Data Migrations/Data Conversion/Data cleansing with the use of Utilities like SQL * Loader, Collections and created custom Stored Procedures, Functions and Packages to load/extract the data from Oracle.
- Experience with Informatica tools- Source Analyzer, Transformations, Mapping designer and Maplets
- Extensively worked with informatica involving source level, target level and mapping.
- Developed stored procedures and packages using PL/SQL for maintaining Patient Information.
- Developed SQL queries using various joins and developed various dynamic SQL Sub queries and Join conditions.

PROJECT # 4:

Project Title	CUSTRACK
Client	Volt Bank, Australia.
Role	Software Engineer
Duration	July' 2017 to Sep' 2019
Domain	Banking
Environment	Oracle 11g, TOAD, SQL*PLUS, SQL Developer, UNIX.

Roles & Responsibilities:

- Performed Master data population by identifying the functional requirements through SQL/Loader.
- Created unit test case documents and performed unit testing with the sample data to evaluate code and data efficiency.
- Created Tables, Views, Constraints, (B Tree, Bitmap and Function Based).
- Worked with Materialized View, Join, Cursor & Views.
- Effectively made use of indexes, analytical functions, materialized views.

ACADEMIC HISTORY:

Bachelor of Business Administration in Alagappa University (2010-2013)

PG Diploma in Personnel Management and Industrial Relations. (2019-2020)

DECLARATION:

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

PLACE: Tamil Nadu, India
