FRONTEND DEVELOPER

I am a passionate frontend developer with over 3 years of experience. I have a keen eye for detail and I'm committed to delivering high-quality solutions. I also have a solid understanding of the development cycle for building scalable applications.

PROFESSIONAL EXPERIENCE

Application builder

- Achieved an **40% improvement in performance** through implementing React Query for enhanced API management and state handling, significantly improving user experience
- Developed the **governance section** for the application, allowing users to manage user roles, integrations, field settings, deployment status, and more, which enhances usability and simplifies maintenance for end users.
- Engineered and implemented a **left navigation panel** for the application builder, featuring search, filter, and sort functionality, along with tree view support. This new left navigation has reduced user time

Page builder

- Implemented **local variables support for pages**, enabling their use across different components. This reduced **global variable usage by 50%** and provided greater consistency in variable management.
- Engineered a solution for a **tree view** of page components and containers with drag-and-drop functionality, **reducing development time by 30%** by utilising the tree view for layout redesign.
- Improved the developer experience by introducing **condition visibility**, which allows no-code developers to easily implement show-and-hide behaviour for widgets. This feature cuts **event usage by 30%** and significantly reduces development time.
- Implemented **copy-paste support** for page builder widgets, allowing users to recreate pages by simply copying and pasting widgets or containers, which cuts down **50% development time**.

Common Component

- Incorporated new components into the **Storybook design system**, making it easier for developers to find applicable components, **improving UI consistency**, and reducing **development time** across projects
- Implemented **right-to-left (RTL) language support** across the entire product, allowing us to reach many countries with native languages that have right-to-left reading habits, leading to a **20% increase in user retention**.
- Developed a reusable **chart component** using the Apache ECharts library, which enhanced styling consistency and streamlined the design of chart applications across the platform, addressing various UX and usability issues

SKILLS

Technical

HTML, CSS, JAVA SCRIPT, REACT JS, REACT QUERY, ZUSTAND, TAILWIND CSS, NODEJS, EXPRESS, REST API
GIT VERSION TOOL, POSTMAN, VS CODE

Soft skills

Problem solving, Collaboration skills, Analytics skills

AWARDS

Star Performer

I proudly received the prestigious **Star Performer** award at the product level in my second year for dedication and outstanding performance at work.

Engineering Rockstar

This award recognizes contributions beyond team tasks, encompassing collaborative work across the team to enhance product performance.

EDUCATION

Bachelor of engineering (BE)

Kongunadu College of engineering and technology, Tiruchirappalli, Tamil Nadu

2017 - 2021

Major in Electrical and electronics

CGPA - 7.89

Higher secondary (HSCC)

Sarojini Vidhyalaya Matric Higher Secondary School

Computer science

85.75 %

Secondary school (SSLC)

Little Angels Higher Secondary School

90.02 %
