## CERTIFICATIONS

- ServiceNow certified system administrator
- Micro Certification - Automated Test Framework
- Micro-Certification - Virtual Agent

## SERVICENOW PROFICIENCY

- ITSM implementation
- Experience in REST web services
- Custom Applications and Modules configuration
- Performance Analytics and Dashboards
- Workflow & Flow designer Configuration
- JavaScript coding (back end & front end)
- Service portal configuration
- Experience in building case exchange with other ITSM tools (Remedy & HP Service Manager)

## ADDITIONAL COMPETENCIES

- SQL Programming
- Linux Administration
- C Language Programming
- Core and Advance Java

## ACADEMIC CREDENTIALS

- **Masters in Networking and Data Communications**  
Kingston University, UK  
(Mar'2020-Apr'2021)

# VENKATA GORENTLA

## *Sr.ServiceNow Developer*

## 👤 ABOUT ME

A competent professional with around **8+ years** of IT experience, including **ServiceNow Developer** and **I Research, develop, and recommend solutions to integrate Development, QA, and production team members and technologies to improve ITSM operations.** Providing ITIL and IT Service Management in IT Infrastructure with expertise. Good understanding and knowledge of all phases of the Software Development Life-Cycle (SDLC) and also familiar with Requirements Gathering, Technical Documentation, Software Validation, Software Release, and Agile Methodologies. Team player with a strong aptitude for interpersonal communication who can work both in a team and independently.

## 👤 PROFILE SNAPSHOT

- An articulate, goal-oriented, and dynamic professional with rich experience in the Technical Implementation of various ServiceNow modules like Change Management, Incident Management, Problem Management, Project Portfolio Suite, Service Catalog, and Configuration Management.
- Implementation experience of IT Service Management, ITSM frameworks as well as demonstrated project management skills and working directly with customers and clients.
- Deep functional and technical knowledge of the ServiceNow Platform as well as experience implementing ServiceNow on a medium to large-scale.
- Experience with complex integrations within the ITSM environment, as well as expertise in developing and maintaining service catalogue items.
- Worked with stakeholders to meet the needs of new service catalogue items, Order Guides, Record Producers, and associated workflows.
- Worked on Email Notifications, Mail Scripts, SLA Definitions, Scheduled Jobs, and Inbound/Outbound actions.
- Experience working with client-side scripting (UI Policy, Client Scripts, UI Actions, GlideAjax) and server side scripting (Business Rules, Script Includes, ACL, UI Actions, Workflow Editor).
- Knowledge of Client Scripts, Business Rules, UI Policies, UI Actions, Script Include, SLA, and Import Sets.
- Experience in designing and developing advanced workflows and custom applications in ServiceNow.
- Hands-on experience in ServiceNow System Administration and Operations.
- Strong in Performance Analytics, Creating Dashboards, Indicators, KPI Reports, Metrics.
- In-depth knowledge of the full software development life cycle with analyzing and implementing workflow processes, Requirements Gathering, Creating User stories, providing Process Improvement recommendations, and a good understanding of agile processes.
- Reduced HR case resolution time by 30% through automation and process optimization.
- Exceptional problem-solving and troubleshooting abilities, leadership qualities, strong analytical, organizational, multitasking, execution, and presentation skills, as well as the ability to co-ordinate activities

## CAREER TRANSITION WITH MAJOR PROJECTS

### **Uniqon Consulting, UK**

Dec 2024- Nov 2025 : [ServiceNow IRM consultant](#)

- Designed and implemented Security Incident Response playbooks, incorporating IRM risk indicators to prioritize incidents, shrinking breach exposure windows.
- Customized IRM applications to align with NIST and ISO 27001 frameworks, enabling real-time risk monitoring and cutting compliance reporting time by 40%.
- Developed REST API integrations between SecOps and third-party SIEM systems, enhancing threat detection and incident triage accuracy.
- Created Performance Analytics dashboards to track vulnerability trends and incident metrics, enabling data-driven decisions that improved SLA adherence.
- Collaborated with security analysts to train 50+ end-users on SecOps and IRM features, boosting platform adoption.

### **Aashi Technologies Ltd, UK**

July 2024- Nov 2024 : [Sr.ServiceNow Technical consultant](#)

- Architected and implemented ServiceNow HRSD modules including Case Management, Employee Service Center (ESC), and Lifecycle Events to automate and streamline HR processes, ensuring scalable solutions.
- Designed and customized HR workflows using Flow Designer, Business Rules, Script Includes, and UI Policies, optimizing process automation and enhancing employee self-service experiences.
- Developed and configured integrations with Workday and SAP SuccessFactors using Integration Hub, REST APIs for seamless data synchronization and real-time employee data updates.
- Automated HR case escalations and notifications by leveraging ServiceNow Event Management and the Notification Engine, improving SLA compliance rates and reducing manual follow-ups.
- Resolved data mapping discrepancies between Workday and ServiceNow by creating custom transformation maps and data import sets, ensuring accurate data flow and eliminating sync errors.
- Training junior developers and collaborating with cross-functional teams to align platform development with business goals.

### **Orange CyberDefense, UK**

Dec 2022-June 2024: [Sr.ServiceNow Developer](#)

- Created and maintained scoped applications for customers, ensuring adherence to best practices and standards.
- Designed, developed, and implemented ServiceNow applications, customization, and integration using REST APIs and other related technologies.
- Developed and maintained End-to-End integration between ServiceNow instances with customers.
- Proven track record of implementing and optimizing ServiceNow CMDB, ensuring accurate configuration item (CI) relationships and alignment with ITIL best practices to drive effective asset and service management.
- Hands-on experience developing custom solutions, automating workflows, and enhancing platform functionality for better CMDB insights.
- Strong analytical skills for resolving complex CMDB issues and integration challenges, while working closely with stakeholders to meet business goals.
- Integrated SecureTrack with ServiceNow to automate security incident management, enhancing real-time response and operational efficiency.
- Developed and implemented workflows in ServiceNow using SecureTrack data, streamlining incident creation and resolution processes for improved security operations.
- Collaborated with UX designers to implement intuitive and user-centric designs, enhancing the overall user experience and satisfaction.
- Designed and developed custom pages on the ServiceNow platform, leveraging a deep

understanding of ServiceNow's architecture and capabilities to deliver tailored solutions that meet client requirements.

- Implemented advanced JavaScript, AngularJS, Jelly scripting, and clean HTML/CSS to develop dynamic, responsive, and visually appealing ServiceNow applications.

## **TECH GUILD, UK**

May 2021 – September 2022: [ServiceNow Developer](#)

### **Project: Health Insurance**

- Performed Requirement Gathering & Analysis - Understanding the requirements of the client.
- I Conduct ITSM Process assessments, and identify gaps,
- I Research, develop, and recommend solutions to integrate Development, QA, and production support team members, processes, and technologies to improve ITSM operations.
- I Grow the team to build the company's ITSM processes and capabilities.
- Created notifications based on user requirements and also configured inbound email actions to create incidents or requests.
- Performed core configuration tasks including UI policies, business rules and client scripts.
- Managed users, groups, and roles in Service Now. Used Import Sets for data loading from external file or database to ServiceNow.
- Configured Service Level Agreements to define certain levels of service from both internal and external providers.
- Excellent knowledge and hands-on exposure in Catalog UI builder, Record Producers, order guides.
- Identifying and implementing new processes to improve the reliability, repeatability, and efficiency of Configuration.
- Performed UAT, installed new modules, release to production, process documentation after Go-Live projects.
- Perform Customization on Incident Management, Problem Management, Service
- Catalog, Knowledge Management, Change Management, Customer Service
- Management and Project Portfolio Management modules including Business Rules.
- Client Scripts, Data Policies, Script Includes, Dictionary Overrides, Root cause analysis.
- Workflows, UI Policies and UI Actions based on user requirements.
- Created the new Applications and Modules, Custom Tables in ServiceNow.

## **OPTUS INFOTECH SERVICES PVT. LTD., HYDERABAD, INDIA**

Jul 2016 – Sep 2019: [ServiceNow Developer & Admin](#)

### **Client: Envision Healthcare**

- Service-Now consultation and implementation.
- Working with functional requirements within ServiceNow for CMS, Catalog Management, Incident, Web services and interfaces.
- Defined SLA and OLA and contract for the customer. Configured SLA workflow for the Advance SLA
- Working with process owners and business stakeholders to translate business requirements into functional requirements.
- Application UI Configuration: Importing configuration and data, as well as working on reports and dashboards.
- Configured custom applications for Service Management using the Service-Now platform.
- Service Catalog and Request Workflow Design and Configuration.
- Design and implement new functionality using Business Rules, Client Scripts, UI Policies, UI Scripts, UI Actions, UI Pages, Script Includes, and Access Control Lists..

### **Client: Roche Pharmaceuticals**

- Responsible for the configuration of the ServiceNow platform for the Incident, Change, Problem, and CMDB modules
- Configuration of Service Catalogs, Workflows.
- Creation of business rules, client scripts, UI policies, UI actions, data policies, etc. for various customer requirements.
- Conduct user acceptance testing (UAT) sessions with stakeholders to demonstrate new innovations.

- Creating ACL's, and SLA Definitions.
- Creating ServiceNow eBonding Integrations.
- Customization of Service portal pages and Widgets.
