

VENKATESH GUNDU

Staff Software Engineering Manager

SUMMARY

Dynamic and innovative Engineering Manager with a passion for continuous learning, leading a team of 6 engineers. Extensive experience in managing end-to-end feature delivery across multiple projects, with a strong focus on UI, backend, and reporting.

WORK EXPERIENCE

Staff Software Engineering Manager

Glance(Roposo) | Bengaluru, Karnataka | July 2021 - Current

Shopatainment/Live Streaming/Ad Monetization:

- Led the optimization of video playback performance for the Roposo app, achieving a 40% improvement for users on slower networks through adaptive bitrate streaming and CDN enhancements. Increased video engagement by 20% and garnered positive user feedback.
- Integrated Google programmatic ads on the Roposo Live platform, significantly boosting revenue and achieving a 30% Direct Response Rate (DRR) from the overall project.
- Led a cross-functional team of over 5 engineers across frontend and backend, actively managing multiple projects and delivering high-impact results.
- Orchestrated war rooms to address critical challenges, ensured timely feature delivery, and provided continuous support for ongoing operations.
- Expertise in maintaining infrastructure stability by identifying and resolving loopholes and leakages, while ensuring the seamless adoption and operation of advanced cloud infrastructure.
- Led the development and deployment of the backend service for an e-commerce live streaming system within 3 months, incorporating scheduling, real-time processing, and delivery.
- Led the team in ensuring ISO 27001 compliance and successfully implemented a streamlined Single Sign-On (SSO) solution. Achieved comprehensive compliance with disaster recovery protocols, data retention policies, and access control measures, all within a condensed timeframe of just 2 months.
- Mentored and supported the professional growth of 6 team members within the current project, fostering skill development, career progression, and overall team effectiveness.

Senior Software Engineer

Walmart Information Systems Division (ISD) | Bentonville, AR | April 2014 - June 2021

Global Integrated Fulfillment (GIF): The GIF is an integration project for Walmart, Sam's Club online shopping, and store pickups that will provide a foundation for a global system that integrates order management, picking, and delivery to the customer.

- Designed and developed Business Services using Spring Framework (Dependency Injection) and DAO Design Patterns.
- Used Jersey framework to develop RESTful web services for clients and UI.
- Applying Spring Framework for transaction management and Spring JDBC for building ORM.

ERX Prescriptions: The ERX prescriptions deliver electronic doctor prescriptions from

SKILLS

- Architecture and Design
- Team Leadership
- Cross-Functional Collaboration
- Performance Management
- Reporting
- Project Oversight
- Problem-Solving
- Team building
- Technical leadership
- Java
- Python
- Spring MVC
- Spring Microservices
- Spring Reactive/webflux
- Spring cache
- Restful web services
- Apache Kafka
- Google pubsub
- MAVEN
- Gradle
- Log4j
- Logback
- HTML
- Svelte
- Javascript
- NodeJs
- Mongo DB
- Cosmos DB
- MYSQL
- Postgre SQL
- Cassandra
- Docker
- Kubernetes
- Helm Charts
- GKE
- Azure
- AKS
- Azure Keyvault

SureScripts to Walmart store systems, so that pharmacists will make the prescriptions available to the customers.

- Designed and developed Spring micro web services to support electronic prescriptions and store the data centrally using Hadoop servers.
- Developed Spring Batch applications to monitor the application.
- Application deployments using the Kubernetes platform.

Software Engineer (Intern)

Wellsfargo Inc. | SFO | July 2013 - December 2013

- Involved in requirements gathering, analysis, and design, and in the development of an application based on J2EE using Struts and Hibernate.
- Created Struts configuration and used validations in the controller layer in MVC design.
- Designed UI pages using HTML5, jQuery.
- Involved in requirements gathering, analysis, and design, and in the development of an application based on J2EE using Struts and Hibernate.

Software Engineer (Intern)

Connecture Inc. | Brookfield, WI | January 2013 - June 2013

- Involved in designing and programming for the system.
- Created Entity Relationship Diagram, Data Flow Diagram
- Used Spring MVC and Hibernate on the back end.
- Involved in designing and programming for the system
- Created Entity Relationship Diagram, Data Flow Diagram

- Hashicorp
- AWS storage
- Nginx
- CDN
- Elastic
