EXPERIENCE

GenWise

July. 2024 – Present

Software Development Engineer

New Delhi

- Worked on user-to-user **chatting feature** using **MQTT**, and optimized **RecyclerView** to handle real-time updates for **online, typing, and message seen** statuses.
- Worked on a real-time **audio/video** calling solution with **screen sharing** capabilities using **100ms and Agora SDKs**.
- Optimized **multimedia**-editing solution with **FFMPEG**, reduced **processing time by 60%** and **video size by 50%**.
- Worked on **integrating third-party libraries and APIs**, implementing **UI** and **optimizing app performance**.
- Built support for **real-time** updates of localized native string resources.
- Extensively optimized **RecyclerView scroll performance** and **video playback**, ensuring smooth user experience in **feed and reels-like** sections.
- Utilized **MVVM, Coroutines, Pagination, API caching, Room Db, Retrofit** for **25L+ users** with **1.68L+ MAU** and **99.9% crash-free users**.

Codenicely Solutions Ltd

June. 2023 – June. 2024

Associate Developer

Raipur

- **Lead a team of 5 engineers** in building and launching a mobile app, while working across diverse domains including **health, finance, and trading applications**.
- Generated **baseline profiles** for faster performance leading to start-up time reduced by **1200ms**.
- Built an **Android TV Launcher** application for marketing and developed its **architecture**, extensively leveraging **Android OS core permissions and interfaces**.

RadicoSoft Technologies

July. 2021 – Dec. 2022

Android Developer Intern

Remote

- Built a **Mental Health app** from scratch using **MediaPlayer, Volley, and Navigation Graphs**.
- Managed potential **ANRs** and crashes, using **Profiler, Leak Canary** ensuring app stability by increasing crash-free sessions by **2%**.

Glossaread Technologies Pvt.Ltd

Nov. 2020 – Jan. 2021

Android Developer Intern

Remote

- Implemented key features like audio bites and enhanced video player efficiency.
- Participated in code reviews, providing constructive feedback and ensuring code quality.

EDUCATION

Visvesvaraya Technological University

2019 – 2023

Bachelor of Engineering, Computer Science

8.2/10 CGPA

PROJECTS

Luffy - Personal Artificial Intelligence bot

- * A personal AI bot leveraging IBM Watson Assistant API, designed to engage users with jokes, fun tasks, and personalized suggestions. Enhanced conversational experience by training the bot to deliver interactive and delightful responses.

SteelLive - Android Trading Application

- * Engineered a real-time trading platform from the ground up, using WebSockets to enable low-latency trade execution and live updates.
