Code Review

An iOS Developer with extensive experience in analysis, design (HLD/LLD), development, implementation, and testing. Specialize in developing applications for iOS platforms with rich and intuitive UI. Strong foundation in Data Structures and Algorithms (DSA), system design, and practical programming. A self-motivated, quick learner and a collaborative team player

Work History

2024-09 -
2025-08

Senior IOS Developer

ONE BCG, Bengaluru, Karnataka, India

- PROJECT: HookZApp - HookZApp is a cloud-native, secure, fast, and feature-rich next-gen communication, collaboration, and social media platform that makes everyday life fun and easy.
- SECURE: All your calls and chats are 100% private, and secured with end-to-end encryption.
- CHAT: An interactive chat screen to keep you connected with your friends and family in 1-2-1 or group chats, featuring loads of options such as reactions, stickers, audio and video messages, media sharing, polling, live translation, and so on.
- CALL: High-quality 1-2-1 and group audio and video calls for free.
- MOMENTS: Share your favorite social and personal little moments with friends and contacts via pictures or videos, complete with optional effects that will disappear after 24 hours.
- Collaborated with cross-functional teams to enhance app features.
 - Designed and reviewed LLDs and HLDs to ensure scalable architecture
 - Troubleshoot and resolved app performance issues effectively.
 - Implemented DSA-based solutions for chat optimize and media handling.
 - Implemented UI/UX designs to enhance user engagement.
 - Optimized the existing codebase for better performance and scalability.
 - Integrated backend APIs into the frontend application layer for data synchronization.
 - Deployed mobile apps on App Store Connect for distribution across all Apple platforms.

- Employed unit and UI tests to ensure code reliability and application stability.

Senior IOS Developer

ONE BCG, Noida

- PROJECT: DMETrack App - Inventory tracking service for durable medical equipment providers
- Participated in sprint planning meetings to determine new features or enhancements
- Utilized version control system for tracking changes made to source code over time
- Created scalable HLD and LLD documents for inventory modules.
- Provided technical guidance to junior developers on coding standards, design patterns
- Used DSA techniques (e.g., HashMaps, Queues) to improve performance.
- Tech Stack Used: Swift-5, Predictive Chat, APNS, Sentry, Git

2020-09 -
2023-05

Senior IOS Developer

McKinley Rice, Noida

- PROJECT: iSyncWave App - Wireless Dry EEG Measurement and Therapy Device Tech Stack Used: Swift-5, Google Firebase Push Notifications
- Designed user experience frameworks applicable to fit only iPad screens
- Experienced with using GCD and NSOperationQueue for Multithreading
- Efficient storage of data using Core Data, SQLite, and NSUserDefaults
- Feature and functionality: 1
- EEG measurement - Real-time graph monitoring during the measurement - Customized measurement time and graph scale modification 2
- EEG Analysis Reports 3
- PPG HRV Analysis Reports 4
- User Management - User account management including profiles.

PROJECT : CareerChat - #1 Recruitment Platform
Tech Stack Used: Swift-5, Google Firebase , Twilio(Chat), APNS.

Key Result Areas:

- Designed user experience frameworks applicable

- to fit both iPad and iPhone screens.
- Worked with quality assurance team to confirm app compatibility with analogous solutions on other platforms.
- Researched and selected APIs for integration into development projects.
- Translated basic design plans into full iOS app frameworks, delegating project components to appropriate team members.

CareerChat provides you the best new-gen hiring experiences. A modern recruitment platform that provides a groundbreaking and disruptive way of recruitment & networking to the new generation. The new-age platform flaunts functionalities like no other.

2018-12 -
2020-08

Assistant IOS Developer

Mobiloitte Technologies India Pvt. Ltd, New Delhi

- PROJECT: Playfit-IOT Wearables - Swift
- This application allows user to synchronize count steps, calories, heart rate, sleep cycle, etc from the PLAYFIT watches and bands so that users can access their information on the go
- Interesting analytics included in the application allows users to assess their fitness profile and improve their overall lifestyle to make fitness an important target
- This app also allows integration with Apple Healthkit giving users access to their activity and fitness records on the Health app allowing them to explore the entire ecosystem around health and fitness as a part of the Apple HealthKit.

Education

2014-06 -
2019-05

Master of Science: Computer Applications

Regional Institute of Management And Technology - Chandigarh, Chandigarh

2013-04 -
2014-03

High School Diploma

The Adarsh School - Kirtinagar, New Delhi, India
