

Vanguru. SaiRam Reddy

Healthcare Integration Engineer | HL7 Specialist | Interface Development & Optimization
Hyderabad, Telangana, India | +91-9573383257 | vsairamreddy007@gmail.com |
LinkedIn: <https://www.linkedin.com/in/sairamreddyvanguru/>

Summary of Expertise Highly accomplished IT professional with 8.5 years of comprehensive experience in Healthcare IT, specializing in HL7 Interface Development and Upgrades. Proven expertise across diverse healthcare workflows and multiple integration engines, including Lyniate Rhapsody, ConnectR, Allscripts Interface Engine, ELink, and Connexions. Adept at designing, developing, and optimizing critical interfaces to ensure seamless data exchange and regulatory compliance (HIPAA, HL7 V2.5). Eager to leverage advanced integration skills and healthcare domain knowledge to drive organizational goals and enhance system interoperability within the healthcare industry.

Domain Skillset

- **Healthcare Applications:** Allscripts Enterprise EHR (Touchworks), Professional Practice Management, Enterprise Practice Management
- **Interface Engines:** Lyniate Rhapsody, ConnectR, Allscripts Interface Engine, ELink, Connexions, Basic Mirth
- **US Healthcare Expertise:** Ambulatory Care Workflows, HL7 Standards (V2.5, V2.3), Regulatory Compliance (HIPAA)

Technical Skillset

- **Healthcare Standards:** HL7 V2.5, V2.3, HIPAA
 - **Related Technologies:** JavaScript, XML, SQL, SQL SERVER
 - **EMR/EHR:** Allscripts
-

Professional Experience

Inventurus Knowledge Solutions Pvt Ltd | Senior Engineer – Integration Engineer

Feb 2025 – Present

- Develop interfaces as per business requirements using Lyniate Rhapsody.
- Optimize existing interfaces through discussions with stakeholders.
- Process 835/837 messages.
- Work on HL7-XML, XML-HL7, and CSV interfaces.
- Ensure reported issues are handled.
- Maintain integration engine to ensure smooth transmission of messages.
- Assist team on developing interfaces.
- Process FHIR messages through API and insert related data into BigQuery.

Optum Global Solution Pvt Ltd | Senior Software Developer – Integration Engineer

Mar 2022 – Feb 2025

- Develop interfaces as per business requirements using Lyniate Rhapsody, EEHR, AEPM, and MS SQL.
- Optimize existing interfaces through discussions with stakeholders.
- Work on CCDA document conversion for EHR conversions.
- Work on HL7-XML, XML-HL7, and CSV interfaces.
- Ensure reported issues are handled.
- Work on conversion projects during business migration from different practice management systems.
- Work on upgrading of interfaces.
- Implement interfaces from scratch in Rhapsody.
- Upgrade Rhapsody applications from v6.9 to v7.3 to overcome security vulnerabilities in a high availability environment.
- Create custom filters for easy maintenance based on the latest version of Rhapsody engine filters.
- Create a backup of messages in a text file for interfaces in a specific directory to address data backup issues.
- Assist business with troubleshooting issues in case of data loss.
- Develop customizations and integrate with other systems, ensuring compatibility and functionality.

NTT Global Delivery Services Limited | Software Development Senior Analyst – Integration Engineer

Nov 2020 – Mar 2022

- Work on issues reported by client through SNOW for Catholic Health Initiatives.
- Monitor interfaces via Enigma tool.
- Design interfaces in Rhapsody.
- Work on OPW – Operation Project Work.
- Work on State Immunization Projects.
- Work on issues in Connexion Integration engine.
- Utilize SVN tool for version control and tracing changes to files.
- Provide on-call assistance as and when required.

Sutherland Healthcare Solutions | Team Lead / Professional – Implementations / Associate Professional – Implementations

Jun 2016 – Nov 2020

- **Team Lead** (Mar 2020 – Nov 2020)
 - Assist and mentor team members on issues and handle escalations.
 - Manage multiple projects efficiently with complete accountability.
 - Ensure every phase of the project is completed as per timelines and all quality parameters are met.
 - Conduct Trainings on Rhapsody interface engine within the team.

- Train clients on Allscripts EHR and PM applications using desktop share and documentation.
- Work on Rhapsody server migration.
- **Professional – Implementations / Associate Professional – Implementations** (Jun 2016 – Mar 2020)
 - Lead various HL7 Interface implementations, including Demographics, Schedules, Charges (ADT, SIU, DFT), Orders and Results (ORM, ORU), Refund and Remit interfaces.
 - Work on interface-related business and system requirements during the analysis phase.
 - Coordinate with other team members to ensure application functionality and workflow requirements are addressed and met.
 - Develop Business Requirements Documentation.
 - Provide workarounds for roadblocks identified during analysis.
 - Create mapping documents for HL7 fields and sub-fields to map data between interacting applications.
 - Work on HL7 Interface implementations with Rhapsody and ConnectR interface engines.
 - Conduct testing/validation of the interfaces and test the setup and functionality post-upgrade (Test and Live).
 - Maintain a detailed issues list and Knowledge repository with the latest updates.
 - Possess sound knowledge on PM & EHR domain and workflows.
 - Utilize Interface Engines: Rhapsody, ConnectR, Allscripts Interface Engine, ELink, and Healthcare applications: Allscripts ProEHR and PM, Allscripts Touchworks, EHR Reporting.

Key Expertise

- Rhapsody application installation and upgrade
- eLink client and server application installation and upgrade
- Training new hires
- AEPM application installations and upgrades
- Implementation of interfaces in eLink interface engine
- Handling escalations

Educational Qualifications

- **B. Tech (Computer Science Engineering)** | VJIT/JNTUH | 2015 | 70%
- **Intermediate** | State Board | 2011 | 95%
- **X Class** | State Board | 2009 | 86%
