

SUMMARY

Java Full Stack Developer with 4.5 years of experience in building scalable and efficient applications. Proficient in Java, Spring Boot, Microservices, and React Technologies. Experienced in CI/CD pipeline using Jenkins and Docker. Strong advocate of Agile methodologies. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

EDUCATION

Aditya College of Engineering

B.Tech (2013 – 2017)

SKILLS

- Programming Languages: Java,
- JavaScript, HTML
- Frameworks: Spring, Spring Boot
- Web Services: RESTful, SOAP
- Microservices: Development
- Authentication and Authorization: OAuth2, OpenID Connect
- Testing: JUnit, Mockito,
- IDE: Eclipse, STS, IntelliJ, VS Code,
- Build Tools: Maven, Gradle
- Web Server: Tomcat
- Database: MySQL, PostgreSQL
- MongoDB, Azure Cosmos DB
- ORM: Hibernate, JPA
- Multithreading: Java Concurrency
- Design Patterns: Creational, Structural, Behavioral.
- Code Quality: SonarQube
- Version Control: Git, Git Bash
- Project Management: Jira, Agile, Scrum
- API Testing: Postman
- API Documentation: Swagger
- CI/CD: Jenkins,
- Containerization: Docker
- Container Orchestration: Kubernetes
- Streaming Platform: Kafka
- Artifact Repository: Nexus IQ
- UI/Front End: React

AWARDS

• Customer Delight Award

Received the Customer Delight Award for consistently exceeding customer expectations and delivering exceptional service

PROFESSIONAL EXPERIENCE

Software Consultant

MSG Global Solutions | 04/2021 - Present

- **Project Name:** Identity profile Management.
- **Project Type:** Global Authentication Portal.
- **Technologies Used:** Java 11, Spring Boot, Microservices, PostgreSQL, Keycloak, OpenShift, Kafka, React

Identity profile management (IDP) is a Progressive Web Application build on Microservices Architecture. The main objective of IDP is to provide registration flow for three different users they are Private customer, Hospital Admin and Social Service Employee. Every Registration, process carryout three steps they are filling up registration Form (Reactive Form), Video Identification (Third party Web service integration) and Two Factor Authentication. IDP also provides user to manage user data in profile management page. I'm also exposed to DevOps using OpenShift & ArgoCD.

Roles & Responsibilities:

- Led the development & deployment efforts for critical Java applications using Jenkins and Docker, establishing efficient CI/CD pipelines.
- Developed RESTful and SOAP APIs with a focus on performance and Security
- Utilized Spring Boot and Spring framework to create scalable microservices.
- Implemented OAuth2 and OpenID Connect for secure authentication and authorization in microservices.
- Conducted Unit testing with JUnit and Mockito to ensure high code quality.
- Managed data efficiently with Hibernate in PostgreSQL databases.
- Optimized application performance using Java multithreading techniques.
- Actively participated in code reviews and maintained code quality with SonarQube.
- Documented APIs using Swagger for improved communication and collaboration.
- Integrated Nexus IQ for artifact repository management and security scanning.
- Ensured consistent and reliable releases with automated deployments using ArgoCD.
- Collaborated within an Agile workflow, contributing to sprint planning, daily stand-ups, and retrospectives.

Java Full Stack Developer

Hyderabad

SUMMARY

- Having 4.5 years of IT experience in development of software applications using Java and J2EE technologies.
- Having hands on experience in Spring Boot, Spring Cloud, JPA, JMS using Micro Services architecture & Kafka
- Experience in cloud platforms Open Shift, Kubernetes.
- Good knowledge in build, deployment and release management tools of Maven, Gradle, Jenkins, Docker, SonarQube, Swagger and Kubernetes, JIRA.
- Experience with version control Git, Bitbucket.
- Experienced in deliveries using Agile Methodology.
- Hand on experience in unit testing using Mocking Frameworks.
- Experience in BDD using cucumber framework.
- Proficient in programming by using IDE's IntelliJ, Eclipse, STS.
- Highly motivated self-learner with good Problem-Solving Skills and committed to learning new technologies.

TOOLS

- **IDE:** Eclipse, IntelliJ.
- **CI/CD Tools:** Jenkins, Docker, ArgoCD
- **Tools:** Git, Maven, Gradle, Kubernetes, Swagger, SonarQube.
- **Cloud:** Open Shift
- **Streaming:** Kafka

PROFESSIONAL EXPERIENCE

Software Engineer

Growth Hack Solutions | 3/2019 – 04/21

- **Project Name:** EMEDRECORDS.
- **Client:** Net care.
- **Technologies Used:** Java 8, Spring, Hibernate, JSP, MySQL, JBoss.

The Emedrecords system uses the service-oriented architecture as a means of designing, implementing, and managing health care services. The new solution of this project is to implement an online software application for maintaining patient's information, doctor's information, nurse information, pharmacy information, and medical record information in a single application. Effective and timely communication between users is the primary goal of this project.

Roles & Responsibilities:

- Involved in developing spring Bean classes and Configuration files.
- Implemented Spring IOC's framework.
- Involved in writing hibernate entity classes and DAO classes.
- Using HQL, Criteria API programming to retrieve data from the database.
- Involved in designing dynamic web pages.
- Understanding the functional requirements and detailed design document.
- Built RESTful web services using JAX-RS API and consumed web service using spring.
- Implemented email notifications using apache commons email API.
