

PROFILE

Results-driven Software Engineer with over 6 years of hands-on experience in Java, Spring Boot, and microservices architecture. Demonstrated expertise across the full software development lifecycle — from analysis and design to implementation — with a strong focus on writing clean, maintainable, and scalable code.

Skilled in test-driven development, design patterns, and modern software engineering principles. A fast learner and self-starter with a deep understanding of business workflows and a strong sense of ownership. Committed to delivering high-quality, efficient solutions while seeking opportunities for improvement.

A collaborative team player with sharp problem-solving skills and a passion for elegant, effective design. Backed by a solid technical foundation and strong communication skills, I bring both technical excellence and a business-oriented mindset to every project.

SKILLS

- **Languages:** Java, Type Script, Python
- **Frameworks:** Spring Boot, Angular, Junit and Mockito
- **Databases:** MS SQL Server
- **Web and Application Server:** Apache Tomcat, JBoss, ActiveMQ
- **Version Controller:** SVN, Git
- **Build and Release Management:** Maven, Jenkins (CI/CD), Nexus
- **Industry 4.0/IIoT:** ThingWorx C1 Certified
- **IDEs and Tools:** Eclipse, Visual Studio

PROFESSIONAL EXPERIENCE

Rockwell Automation India Private Limited 06/2018 – 03/2025

▪ Product Development:

- Spearheaded the development of a comprehensive product suite, demonstrating strong leadership and technical expertise throughout the process.
- Successfully integrated systems, utilizing Rest API calls through ActiveMQ, to enable seamless communication and data exchange. This integration showcased innovative problem-solving capabilities.
- Worked closely with cross-functional teams to continuously improve the product suite, contributing to its ongoing evolution with advanced UI components.
- Actively participated in the development, anomaly analysis and fixing, and testing phases of product build releases.
- Proficient in implementing robust CI/CD practices using Jenkins pipelines, demonstrating expertise in streamlining development workflows, automating build and deployment processes, and ensuring the reliable delivery of software solutions.
- Conducted RCA to resolve defects, identified anomalies to improve reliability, and collaborated with teams for efficient bug resolution, enhancing product stability with preventive measures.

▪ Proof of Concept (POC):

- Developed and presented successful POCs using Java and Type Script.
- Created tangible demonstrations to showcase the feasibility and functionality of proposed solutions, utilizing advanced UI components.

▪ Team Leading:

- Led teams in onsite and offshore operations, ensuring the successful completion of projects from requirement gathering to go-live phases.
- Facilitated seamless collaboration among cross-functional teams, actively engaging with business users, project managers, and engineers to achieve elegant solutions through coordinated efforts and expertise.

▪ Customer Interaction:

- Actively participated in client workshops to gather essential project requirements and created Functional Requirements Specifications (FRS) and Functional Design Specifications (FDS) documents to ensure clear project scope and design alignment.
- Conducted product demonstrations and showcased the functionalities of the product to potential customers, leading to an increased conversion rate compared to previous demonstrations.
- Collaborated with customers to identify key requirements, resulting in the creation of primary Functional Requirement Specifications (FRS) and multiple site-level FRS documents.

▪ Client Customizations:

- Developed and implemented a scalable end to end solution using Java Spring Boot, enhancing product functionalities to enable seamless interaction with devices, which significantly improved efficiency in order and inventory management.

ACHIEVEMENTS

- **Received ISB Customer Excellence Award (2019):** Recognized for outstanding performance and contributions to customer satisfaction.
- **Project Leadership and Delivery:** Successfully led key projects, earning appreciation from the Project Lead and Program Manager for timely and effective delivery.
- **Root Cause Analysis (RCA):** Appreciated for conducting detailed RCAs, with my documentation set as a reference for future investigations and best practices within the team.

- Designed and optimized thin client screens, ensuring a seamless user experience, and considerably optimizing response times.
- Transformed high-level designs into detailed low-level designs and presented them during sprint grooming sessions.
- Led peer to peer code reviews to ensure adherence to coding standards.
- Developed comprehensive unit test cases to improve test coverage and maintain high code quality.

EDUCATION

Bachelor of Engineering in Computer Science, 2018 - JSSATE - affiliated to VTU, Bengaluru.

Postgraduate Program in Artificial Intelligence and Machine Learning
Currently Pursuing – BITS Pilani
(Expected Completion: March 2026)
