Skills

Stakeholder collaboration	Microsoft Excel
Python-Statistical Programming	Data Analysis
Power BI	Business Intelligence
Business Analysis	Structured Query Language (SQL)

Professional Experience

Business Analyst 03/2023 – present
Oracle

- Leveraging my expertise in data management, I cleaned 3,500 defunct audience categories in the OA BlueKai platform, enhancing advertiser targeting and client experience, and contributing \$6 million in revenue.
- Managed and executed ad campaigns across multiple platforms, ensuring they met client goals and delivered on objectives, upholding high standards of campaign fulfillment.
- Developed and managed dashboards for sales, renewals, and business development, driving data-driven decision-making and aligning internal teams with business goals and strategies.
- Improved data quality and ensured accurate revenue attribution for campaigns (e.g., Google Custom Audiences) through data cleansing and ongoing quality initiatives.
- Performed monthly revenue analysis for audience segments, maintaining accurate tracking during data taxonomy shifts, and providing actionable insights to stakeholders.
- Developed UAT scripts and implemented process improvements to boost operational efficiency and accuracy in automation projects.
- Created user-friendly dashboards (e.g., Global LVM Pipeline Dashboard) to transform complex data into actionable insights for internal stakeholders.
- Developed and maintained accurate, compliant weekly performance reports for sales operations, ensuring effective monitoring.
- Cultivated strong stakeholder relationships through consistent communication and campaign updates, fostering business alignment and client satisfaction.

Data Engineer 06/2021 – 07/2022
Cisco Bengaluru

- Developed and maintained ETL pipelines using Python and SQL, processing over 100GB of data daily for timely and accurate data aggregation.
- Created interactive visualizations and dashboards using MS Excel and Tableau, enhancing data accessibility for analysts and stakeholders.
- Utilized MS Excel, Tableau, and SQL to create detailed reports on weekly bookings, sales, and revenue.
- Created SOPs for multiple processes, demonstrating strong communication and documentation skills
- Automated routine tasks with Python scripts, increasing team productivity and reducing manual errors.

Data Analyst 2019 – 2021
Numerator

- Identifying, analyzing, and interpreting trends or patterns in complex data sets. Analyzing Digital, Email, and Outdoor media.
- Normalization and generalization of data that was collected from the USA-based clients.
- Prepare a detailed report of products as per clients' requirements.
