RESUME

QA Automation & Functionality Tester

Python - Selenium Scripting

PROFESSIONAL SUMMARY

➔Test Automation Development:

Designed and developed automated test scripts using Selenium WebDriver with Python.

Created and maintained a comprehensive suite of automated test cases for web applications to ensure thorough test coverage.

Implemented data-driven testing strategies to enhance test efficiency and coverage.

➔Framework Development:

Developed and maintained custom automation frameworks to support test automation efforts.

Integrated testing frameworks with CI/CD pipelines (e.g., Jenkins) to enable continuous testing

➔Test Execution and Reporting:

Executed automated test suites, analyzed test results, and reported defects using tools like JIRA.

Collaborated with development teams to troubleshoot and resolve issues uncovered during testing.

Generated detailed test reports and metrics to track test progress and quality metrics.

➔Collaboration and Communication:

Worked closely with developers, QA analysts, and product managers to understand application functionality and business requirements.Participated in agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, to ensure alignment and continuous improvement.Provided regular updates on test progress, challenges, and risks to project stakeholders.

➔Continuous Improvement:

Conducted code reviews and provided feedback to peers to ensure high code quality and adherence to best practices.Identified opportunities for test process improvement and implemented enhancements to increase test automation effectiveness.Kept abreast of emerging trends and technologies in test automation to incorporate new tools and techniques into the testing process.

WORK EXPERIENCE:

➔QA Lead Automation

Virtusa, Pune

2020-11- 2022-03

➔QA PM Automation

Larsen & Toubro Infotech Limited, Pune

2017-09 - 2018-10

➔QA Associate Projects

Cognizant Technology Solutions, Pune

2011-11 - 2017-08

➔QA Analyst Programmer

Syntel Limited, Pune

2010-04 - 2011-09

➔QA Test Engineer

Keytone Technology Systems Pvt. Ltd, Pune

2009-02 - 2010-03

➔QA Jr. Software Engineer

WiKi Ocean P&P Software & Systems, Pune

2008 - 2009-01

PROJECTS EXPERIENCE:

❖British Telecom - Plusnet: FTTP BBO only

❖Barclays: CLP Cash Liquidity Program And FCUBS

❖Credit-Suisse: CRD-IOMS AND BFI

❖Nvidia: SP 2007 - O365

❖American Express: Merchant Underwriting And Alerts and Notices

❖Fermax

❖Openbravo ERP System: ERP Software Customizations for different Clients

AWARDS & CERTIFICATES:

★QA Professional Certificate - ISTQB Certified

★Pillar of the Month - Project Delivery Apr 2017 honor issuer - Cognizant | QE & A

★Pillar of the Month - Project Delivery Apr 2015 honor issuer - Cognizant | QE & A

★Certificate of Appreciation Jul 2014 honor issuer - Credit Suisse

★Certificate of Appreciation Jun 2011 honor issuer - Syntel

★Certificate of Excellence in Quality Assurance by ATS Infotech - Feb 2009

EXPERIENCE IN TESTING:

➤Total IT exp : 12.9 yrs

➤Automation Testing exp : 3 yrs

➤Functional Testing exp : 9.9 yrs

EDUCATION

Masters in Computer Science -

2008 RSSP IMCS College,

University of Pune, India

➤ISTQB Certified

SKILLS

➤SELENIUM

➤PYTHON

➤PYCHARM

➤PYTEST

➤JENKINS

➤JIRA

Testing Certificate

➤ISTQB Certified

TECHNICAL SKILLS:

➤Programming languages:

Python

➤Selenium Components: Selenium

WebDriver, Selenium IDE,

Selenium Grid

➤Editor: PyCharm

➤CI/CD Tools: Jenkins

➤Version Control Systems: Git,

GitHub

➤Bug Tracking Tools: JIRA

➤Web Technologies: HTML, XML

➤Framework: DataDriven

➤Database: SQL

➤Browsers: Chrome, Firefox,

Edge

➤Browser Drivers: chromedriver,

edgedriver, geckodriver

➤Python Interpreter: 3.12

➤O.S: Windows, Mac, Linux

➤Parallel Execution: Command

Line Runner

➤Framework Library: Pytest

➤Execution Report: Pytest-html

Report

➤Test Data Generator: Faker

Python Package

➤DataDriven: ddt package,

xlsx, .csv,.yaml, .json

➤API Testing Python Module:

◆British Telecom - Plusnet: FTTP BBO only | Nov 2020 - Mar-2022

Synopsis: Rollout of FTTP-BBO only products with higher upstream/downstream speeds to different sets of customers like residential, business , John Lewis (partners) etc. Upgrading and migrating both Greenfield and brownfield journeys. Incorporating products tariffs and pricing rules into billing, broadband availability checker upgrade, consuming supplier KCI's related to new products and so on., following agile methodology.Environment - Jira, Jenkins, C2M-API, Round-cube, Plusnet workplace, Confluence, Selenium-Python (Automation)

◆Barclays: CLP Cash liquidity program AND FCUBS | Apr 2015 – Oct 2018

Synopsis: Online payment transaction, using GCP+ -(Global Cash Plus) to debit/credit customer account via online transaction using various formats such as CSV, MT101, PAIN. Adding features to online payment transaction Application like adding beneficiaries to account, and adding new products to account and so on.Environment:: GCP+, Visual Studio, Java, MS Word, Excel, Notepad++, WinSCP, Jira, Selenium-Python (Automation)

◆Credit-Suisse: CRD-IOMS AND BFI | Mar 2012 – Jul 2015

Synopsis: IOMS is a complete order management system used by front Office of CS – Americas region. It includes testing of an order management tool CRD and its integration with other third party applications such as GOMAN / QTE.Enable Finance to identify direct and indirect investments related to BFI for future investments predictions

Project 1: CRD-IOMS (Charles River Development - Integrated Order Management System)

IOMS is a complete order management system used by Front Office of CS – Americas region. It includes testing of an order management tool CRD and its integration with other third-party applications such as GOMAN / QTE. This system is used for trading Equities and other Derivative Instruments such as Options, Swaps etc. Modules such as placing an order, Pre-Trade Compliance, Trade Execution, Securities management, Post-trade compliance, Securities management, and integration of third part orders - OASYS / ADVENT trades and Portfolio rebalancing are key features of the application.Environment: Visual Studio, Java, PLSQL, MS Word, Excel, CRD Application, QTE, Goman, QTP with Mars

Project 2: BFI (Banking and Finance Investment)

Purpose of the project is to enable Finance to identify direct and indirect investments related to BFI. In scope data is extracted from existing tables based on different identification logic's such as Netting logic, identification Logic, aggregation, decomposition and so on.... The final extracted data is fetched in the form of report extract file and is used by CFO for future investments predictions.Environment: Quality Center (QC 10), RDS GUI, PLSQL-PLSQL Developer Version 8.0.4

◆Nvidia: SP 2007 - O365 | Nov 2011 – Feb 2012

Synopsis: Migration of data from Share-point server 2007 to O365 (Cloud). To avail benefits in terms of features and maintainability.Compare inventory report with Post migration report, Analysis of failed, skipped & exceptions, Sampling of target sites, sub-sites, discussion board, lists, libraries, Workflow functionality verification,User , Group Privileges verification (Security) Areas Covered: Data, UI, Functional, Security validation.Environment: Metalogix tool, QTP ALM, Nvidia bug report tool (Internal), IE 11, Chrome 55, Firefox 45

◆American Express: Merchant Underwriting AND Alerts and Notices | May 2010 – Sep 2011

Synopsis: To sell credit cards to eligible merchants.Providing facility to customers/merchants to enrol i.e. setup their bank A/C by themselves by using online portal. In this online portal a merchant has to fill different forms and submit the same for approval to Amex.Alerts and Notices are displayed as per business defined rules

Project 1: ESNA TCOE (MTI) Testing Team (Merchant Underwriting)

The motive of this project is to provide facility to its customers/ merchants to enrol i.e. setup their bank A/C by themselves by using online portal named iWITH i.e. internet want to honor. In this online portal, a merchant has to fill different forms and submit the same for approval to Amex. @background:

The application request with details goes to SEIMS where all the validations i.e. edit checks are done and then it is passed to GNA for further checks like CBR....Project Objective: To sell credit cards to eligible merchants.Environment: Visual Studio, Java, MS Word, Excel, Cobol, Mainframes

Project 2: ESNA TCOE (MTI) Testing Team (Alerts and Notices)

Alerts and Notices is an Amex project and it is designed to provide various types of alerts on MS# application depending on various scenarios and different options opted while doing SE setup's and also alerts are popped out when end dates are near or any event is going to occur soon or if merchant is changing plan ...plan can be pricing plan or opting for different package.My role in this project was to check the alerts are displaying properly and also displaying for the required scenarios and triggering at the right time i.e. on due dates ...etc. Environment: Visual Studio, Java, MS Word, Excel, Cobol, Mainframes

◆Fermex | Feb 2009 – Mar 2010

Synopsis: Single platform which deals with Real Estate properties management. User friendly web portal with role based access to the functional components. Environment: QC, SQL, Java, MS Word, Excel, Win

◆Open Bravo ERP System | Jan 2008 – Jan 2009

Synopsis: Customization of Costing,Billing,Time and Expenses and Activity Management. Customizing Supply chain Management: Order Entry,Claim Processing,Commission Calculation.
